Microsoft

Microsoft Education Partner Solutions

March 2022

An Introduction from the Microsoft Education Team

Over the past two years, educators around the world have been focused on accelerating learning for all. However, the pandemic continues to widen pre-existing achievement gaps.

Microsoft is committed to supporting school leaders and educators as they work to address the most challenging problems in education today, like equity, accessibility, learning loss, and student well-being.

We're continually evolving our education solutions to deliver insights and information that enable learning to be personalized for every student, and to create inclusive immersive experiences to keep them engaged and connect them with one another and the world beyond the classroom.

Digital tools developed by Microsoft and our partners can help all learners build the critical skills necessary to reach their goals in the classroom and beyond. When education technology is inclusive and accessible by design, every student has the opportunity for a quality education that leads to a more fulfilling life.

During this shift, technology is playing a critical role in enabling students to stay connected, engaged, and motivated. Teachers around the world continue the learning journey with their classes by integrating video, game-based learning, and powerful collaboration tools into their virtual lessons. Students are experiencing a new type of learning, which will have an important, lasting impact. Institutional leaders have told us that going online is about more than remote instruction – it is about implementing solutions that will keep departments running smoothly and evolve with the changing needs of students and staff. Even with all the incredible fast work, administrators and leaders acknowledge they are navigating uncharted territory, and there is more to be done to ensure all students can participate.

As we look to the next school year and beyond, system leaders, educators, faculty, students, and families will apply what they've learned throughout the process and work together to plan and shape the future of education.

This solutions brochure compiles many of our 3rd party partners who integrate their various solutions with Microsoft technologies, including Windows, Azure, and Microsoft 365. Moreover, we created this solutions brochure to ensure educators like you can easily locate our partner solutions tailored to your needs. We hope you find this collection valuable in your return-to-school planning, and beyond, while you are adopting the new hybrid learning approach.

We invite you to learn more about some of these solutions by following the links in the brochure and visit http://www.microsoft.com/education for more info!

Table of Contents

Please note: Partner app/solution experience and availability may vary by region and device.
