

Bring your remote classroom into a single hub with **Microsoft Teams**

Microsoft Teams was built for education and continues to evolve based on educator feedback, research, and market insights. With Teams, you don't get just calling and meetings, you get a collaborative learning tool designed to enhance communication across the entire school. With conversations, assessments, apps, and content, all in the same place educators save time and students can take ownership over their learning

Classroom Tools

Support for educators to facilitate impactful classroom experiences virtually

Assignments – Create assignments for students that seamlessly integrate with familiar Office tools, Forms, and Stream

Grading – Quick and easy online grading including rubrics

Video conferencing – Keep learners engaged in the classroom with intuitive conferencing controls

Student Engagement

Tools for students to collaborate and be heard in meaningful ways

Integrated Office 365 Apps – Work seamlessly with all Office products, such as Word and PowerPoint

Integrated 3rd Party Apps and LMS – 29 EDU focused apps available as well as integration with existing learning management systems

Polls – Get instant feedback with integrated Forms, and Polly

Praise App, Stickers, and GIFs – Encourage collaboration, student recognition, and fun

Inclusivity and Accessibility

Give students control with a range of inclusive features for all types of learners

Immersive reader – Read aloud capabilities for both written and math equations

Translation – In-chat message translation to 60+ languages

Transcript generator – Autogenerated editable transcript with live captions

Security and Compliance

Built in global security and compliance standards

Manage chat – Mute disruptive students and turn off chat functions to encourage focus time

Designated roles within Teams meetings – Grant presenting power or audience only privileges to students

Limit participants – Prevent unwanted participants joining your classroom meeting

Why Teams

- 1 Brings everything together into a single place**
The go-to tool for remote learning with text, audio, and video chat
- 2 Integrates seamlessly with all your Office 365 applications**
Never miss a beat or worry about transferring over Word, Excel, PowerPoint and Outlook. With built in integrations students collaborate and share learnings in one place
- 3 Simplifies class management and save your teachers time**
With School Data Sync you can automatically sync with your current SIS to generate class rosters and groups within Teams
- 4 Robust safety and security**
Use built in security and control features to ensure safe learning environments

I had used Google Classroom in the past, but Teams is so much more. You can have everything..., regardless if it's a file, a video, or an assignment... What surprised me was the limitless possibilities for sharing communication—Teams enables me to teach almost anything online.
