A quick guide to Math Solver

Created by @miss_aird

What is Math Solver?

Microsoft Math Solver app provides help with a variety of problems including arithmetic, algebra, trigonometry, calculus, statistics, and other topics using an advanced AI powered math solver. Simply write a problem on screen or use the camera to snap a math photo. Math Solver instantly recognizes the problem and helps you to solve it.

Solve Equations

After opening Math Solver, you can use the selection tool to capture the math equation you want to solve or enter it using the math keyboard.

Graph Problems

Scan and plot x-y data tables for linear/non-linear functions. Instantly graph any equation to visualize the function and understand the relationship between variables.

Step-by-Step Explanations

Get step-by-step explanations, see how to solve problems and show your work.

Write Equations

Write an equation on screen as you naturally do on paper. Scan printed or handwritten math problems.

Type and edit using advanced scientific calculator.

Practice, Practice, Practice

Search for additional learning materials, such as related worksheets and video tutorials based on the equation solved.
