Microsoft Showcase Schools are a global community of K-12 schools using digital transformation to create immersive, inclusive experiences that inspire lifelong learning and empower students to achieve more.

The diverse members of this program have leveraged Microsoft’s Education Transformation Framework to drive a culture of learning, innovation, and continuous improvement. Their hard work is reflected in improved learning outcomes for their students and an increased focus on future-ready skills. It has also provided them with the resiliency and agility needed to effectively transition to remote and hybrid learning during disruptions such as the COVID-19 crisis.

Each school who enters the Showcase School program starts at some point on the Showcase School Rubric and continues their education transformation journey at their own pace, with the support of their peers, Microsoft, and its partners all along the way.

Helping education leaders achieve sustainable transformation

Showcase Schools benefit from Microsoft’s commitment to holistic, sustainable transformation, guiding school leaders along an established framework that helps them navigate complex challenges, envision what’s possible, and develop a strategy to achieve it. This Education Transformation Framework—grounded in research and based on decades of work with policymakers, school leaders, and educators around the world—helps schools improve in four main areas:

- **Leadership & policy**
- **Teaching & learning**
- **Intelligent environments**
- **Student & school success**

As Showcase Schools progress along their education transformation journey, they are supported by Microsoft, their partners, and each other through capacity building, guidance, peer learning, amplification opportunities, and early access to research and solutions. School leaders also regularly enjoy connecting and learning from each other through the vibrant Showcase School community on Microsoft Teams.
Unlocking limitless learning with technology

Microsoft is committed to being a long-term partner for education transformation. In addition to the Showcase Schools program and the Educational Transformation Framework, Microsoft also provides a wide range of devices, software, applications, and professional development to help educators improve learning outcomes for all students. Each Showcase School implements these tools in their own unique ways, sharing best practices and helping each other to achieve more.

Abraham Lincoln High School

We are a large, diverse, urban school in Brooklyn and are proud to offer one of New York City’s only dedicated four-year computer science programs, culminating in two AP Computer Science courses. We began the journey as a Microsoft Showcase School starting in 2017 with just two teachers using Microsoft Teams. In two short years we were able to get all 124 teachers and 60+ support staff members on board and using Teams in innovative ways.

We continue to strive for the best in digital learning to prepare our students with the skills they need in the twenty-first century. Most of our specialized programs—including Computer Science, Cisco Networking Academy, Virtual Enterprise, Digital Media, and Photography—as well as our current partnership in HE3AT, a STEAM education program through New Lab, offer students exposure to cutting-edge technology.

Cannella Elementary

This past year as a Showcase School, many of our teachers became Microsoft Innovative Educator certified. We also integrated Microsoft Teams to increase engagement and clear communication. Additionally, in-house technology professional development allowed for increased use and comfort level with Microsoft tools. What a game changer it has been so far! We are sending all parent communication and surveys using Forms. This has helped us quickly gather important data, such as how many of our students need to borrow laptops for the upcoming school year, so we can prepare. Teachers are creating engaging and lively PowerPoint presentations to communicate with parents and teach students. Excel has allowed us to break down data to address students’ academic needs, while also enabling us to support our school’s mission to narrow opportunity gaps for all students.

Canyon Creek Elementary

Canyon Creek Elementary provides an excellent 21st Century educational experience for their students who are engaged in real world experiences and given the opportunity to focus on STEAM (Science, Technology, Engineering, Art, and Math). To accomplish our purpose, we: Teach 21st Century learning skills and focus on student learning outcomes where individual students are highly engaged in meaningful quality instruction from highly qualified teachers. Work together as administrators, teachers, staff and parents with our Community Council and PTA to provide a positive successful learning environment with opportunities for parent and student choice. We offer many after-school enrichment activities. We work together to ensure all students are highly engaged as they receive quality instruction. Students have the opportunity to engage in social emotional learning and enrichment based upon their interests. Achieve growth in all academic areas as students work to attain proficiency in a kind, safe, and respectful environment where they are taught to be responsible and, in turn, are successful. Provide professional development resulting in excellent effective educators that increase learning outcomes for students. Collaborate in DCT (Davis Collaborative Teams) where teachers use common ongoing assessment data to guide planning and instruction. Provide support and resources so every student can learn. Teachers at Canyon Creek Elementary provide a positive engaging learning environment for all students in every classroom. We teach our students to have a growth mindset and to problem solve. To ensure educational standards will be mastered, teachers provide daily instruction to focus on learning outcomes. Students develop collaboration skills, by working together to solve real world problems. Our teachers are digital leaders and use data to inform their instruction. It is our responsibility as educators to prepare our students for an ever changing future and undiscovered career opportunities in the word of STEAM.

O’Dea High School had deployed Microsoft Teams across its curriculum long before COVID-19, so our transition to virtual learning during the COVID-19 lockdown was not particularly disruptive. Educators can use the Teams platform in many ways—just as they would take advantage of their classroom space differently—depending on teaching style, variations in pedagogy, and course material. Students are actually more on task because they’re not in this kind of mob mentality of all being together in one room. With OneNote, they know the teacher is going through their notebooks as they’re working. There are lots of ways to keep them accountable and on-task.

From the IT side, we love that it manages itself. We set it up every year with School Data Sync (SDS). To support our registrar, if students need to change classes, all their Teams and everything are automatically switched thanks to SDS.

Phoenix, Arizona, United States

Ombudsman Charter East

We are a small, alternative charter high school located in Phoenix, Arizona. We work with 120 non-traditional learners in a blended learning environment. We serve students with behavior issues, students who have dropped out and are now returning, students with adult responsibilities, and students who are adjudicated in the juvenile justice system. Building strong individual relationships is essential to our ever-growing and diverse community of learners and Microsoft has been a critical resource. Using Microsoft tools has put students back in charge of their learning, allowed for flexibility, addressed absenteeism, and promoted communication and connection.

Our success with technology comes from the creation of a 1:1 environment, a deliberate and thoughtful integration of Microsoft tools into daily practice, and a commitment to innovation by staff and students.

I would need 9,000 words to fully report how Microsoft technologies have improved our school and given us the level of success we enjoy today. Our Surface devices have made all the difference in our classroom instruction, especially during our hybrid learning journey. All our teachers have a Surface Book 2 and we are 1:1 with Surface Go from 1st through 8th grade. Each room has a Microsoft Display Adapter, and all these tools combined make for an incredible learning experience. The ability to use digital inking has been a life saver for both the teachers and students, especially with online classes.

Pembroke Pines, Florida, United States

Pembroke Lakes Elementary

Our teachers have used Canvas and Microsoft Teams to create innovative classrooms that are individualized for student needs. Teachers have students join them in small group instruction while also providing students with “must-do” and “may-do” playlists for independent work. One challenge we faced was translating graded assessments into real-time instructional decisions. Forms allows us to do this using any assessment (even if it was already created on paper), by having students simply transfer the answers they have on paper to a Forms assessment. This enables our teachers to quickly evaluate assessments and make quick instructional changes that best support student learning.

One challenge when we went fully remote in March 2020 was to figure out how to adapt to continue teaching future skills. We wanted high school students to experience what it was like to identify a real problem and enact learning as if they were a team of people creating a start-up company to solve a problem. They focused on personal protective equipment (PPE) and then used a range of Microsoft tools to create two videos. In the first one, they described their process, what they learned, and what tools they used. In the second one, they explained the challenges they faced and what they learned from them.

Santa Margarita Catholic High School

Over the past seven years we have hosted many Showcase School visits on our campus for schools across Southern California. In fact, the three other Showcase Schools (SCS) in Southern California visited us before building their program and applying to be a SCS, including one who converted from Google to Microsoft after spending time with us.

Our advice to schools just starting out? Have a growth mindset while also maintaining patience through a process that is rocky at times. There have been several key points where we had to make a quick decision to shift gears, and maintaining a focus on growth was very helpful. It’s also important to connect and communicate clearly with your entire community. You will need their help and support through the entire journey.

We wanted to improve student learning outcomes and prepare them for today’s workforce. Working with our local Microsoft Store, we implemented a 1:1 Mobile Learning program that helps students learn new skills and complete their projects—both in and outside the classroom. Students use Surface Pro 6 for tactile learning across subjects, ranging from physics to physical education.

We now host many “Technology Open Houses” to help other schools learn from our digital transformation. Our 1:1 success and this innovative partnership has greatly increased the number of Microsoft schools in our area and led us to be recognized as the US Showcase Schools Top Community Influencer for 2019-2020.

St. Paul’s Episcopal School

St. Paul’s strives to create a dynamic learning environment that educates the whole child and prepares them for a changing and challenging future. Integrating tools like OneNote, Office 365, and Microsoft Teams into our 1:1 program has allowed our students to collaborate with one another and learn the skills they will need for college and the workforce. Our success with technology stems from our focus on professional development. For teachers to integrate technology into their classroom successfully, they need to be comfortable and confident with it. We have designed professional development that is immersive and reflective. It allows teachers to experience what it is like to be a student in the classroom, which gives them a deeper understanding of the practices that are most efficient and effective for students.

We are a Microsoft Showcase School and pride ourselves on being a model school for technology implementation. One of our goals, as we continue in this education transformation, is to have 100% participation from our faculty and administration as Microsoft Innovative Educators. The next goal is to have at least one teacher per grade level (K-8) on our Technology Leadership Committee, so that each grade level can have technology support during planning sessions. We’re also making strides toward taking our learning to different locations with digital field trips and guest speakers. A final goal we have is to continue moving towards 1:1, 2:1, and 4:1 classrooms (based on the grade levels of the students). As we tackle these goals, we continue to keep in mind that technology enhances/supports instruction and learning, it does not replace it.

Ursuline Academy of Dallas

Ursuline Academy has made bold choices and moved forward with confidence in part due to our partnership with Microsoft. All faculty, staff, and students use Surface Books and faculty also have Surface Hubs in the classrooms. O365 is used campus-wide, across all disciplines, and across all departments. This has enabled everyone to work efficiently, confidently, and without interruption during our forced closure due to the COVID-19 pandemic, as well as when we returned to campus for hybrid learning. Our integration of technology has also enabled us to equip our students with future-ready skills that help them transition easily from K-12 to higher education, and ultimately into the workforce.

Westminster Christian School

Westminster Christian School is a one-to-one school for students at the middle and high school level. Using Microsoft tools allows our students to excel with technology by giving them the freedom to embrace it in a developmentally, age-appropriate manner. It removes the hurdles and empowers them.

Our biggest challenge has been working with elementary students, since they are just starting to develop basic technology skills. Memorizing usernames and passwords, opening and saving files, and keyboarding are just a few tasks that can be quite difficult for an elementary student to master. However, Microsoft Surface devices minimize these challenges with a touch screen that can be used with Surface pens or fingertips, making it very user friendly for our younger students.

Westminster Christian School

Miami, Florida, United States
One of our challenges has been how to engage with our families during virtual learning. We have a very diverse population (over 35 languages spoken) and parents were not getting information and/or able to connect with staff members very easily. We started using Microsoft Teams live events to broadcast monthly events. Families can ask questions that they want addressed in these events beforehand using Microsoft Forms. We have also shown them how to use the translation features in Teams and Forms, so these tools are accessible for everyone. We are connecting with more families than ever through these real-time question and answer sessions. This new practice came about because of virtual learning but will stay in place even when we are back to normal because it has been so impactful!
Ponce, Puerto Rico

Academia Ponce Interamericana

The academy since its inception in 2014 has led innovative education in the southern area of the island. The teaching staff is committed to technology and also has modern technological infrastructure, tablets, laptops and electronic whiteboards in the classrooms. Office 365 is used in all academic and administrative areas.

Instituto Cumbres Y Prepa Anáhuac Oaxaca

Our school was founded in 1999 with 6 groups and 124 students in Oaxaca, in the south of Mexico. Currently, 829 students are enrolled in our school, of which 50.22% are boys and 49.77% are girls. We offer the Advance Placement Exams. We have already 12 generations of graduates, all of them underway in their professional life. It sounds easy, but the history of our school is filled with a family effort but mostly of profound unity and love for children, youth and families. We celebrate the talents of each student, which make them who they are, as well as the rhythms in which they learn, develop and excel. The student is the protagonist of their learning and the entire educational community, together with their family, accompanies and guides them to reach their best version. The students who graduate from our school are well-equipped for college: intellectually, by possessing a rich store of knowledge, a love of truth, and a set of skills and habits necessary to tackle higher learning; humanly, by possessing characters that are well-grounded in human virtue, master of their actions and choices; spiritually, by continually maturing in the life of grace and possessing a friendship with Christ that impels them to live in Christian authenticity; and apostolically, by their disposition of service towards others in their totality as human persons – body and soul. The professional staff is composed of teachers, administrators/coordinators, and support staff.

Instituto por Cooperativa Villa Hermosa

In 1998 the "Institute of Basic Education by Cooperative of Villa Hermosa" (ICVH) was founded, as an institution dedicated to the teaching of basic, mixed, secular, values, and non-profit education, for Guatemalans who wish to improve themselves. The establishment has highly qualified staff dedicated to their teaching work, the purpose is to promote skills and develop attitudes in students that prepare them for success. It also has extensive facilities for the convenience of the educational community and the use of Microsoft tools to reach each of them.

**Ombudsman Charter Metro High School**

Ombudsman Charter Metro High School is an alternative charter high school in Glendale, Arizona. We usually have a 350 student enrollment; due to the pandemic, this year we only had an enrollment of about 200 students. We provided a hybrid model, where some students remained remote and some onsite. We are confident that once families become comfortable sending their students to school, our enrollment will increase. Our school community is low income and includes many group homes, foster homes, and short term rentals in the area; making our enrollment very transitional. Most of our students have not been successful at a public or private high school. This may be because they need a shorter school day, have difficulty with attendance, are homeless, are single parents, are the sole financial support of their family, or they just don’t feel like they fit into a large high school. The majority of our students come with academic deficiencies and need the supports that our small school can offer. Our high school offers two 4 hour school sessions. We have a blended learning model. Our students receive direct instruction for Math and English and work on History, Science, and Electives on our online platforms; with the support of our lab teachers.

Our institution is a private school located in the State of Mexico in a semi-rural area, although it is private, it serves a vulnerable sector of the population, that is, workers in the area and each of the students has access to all the resources offered by the institution from the library, medical services, dentist services, psychological services as well as food security. The students, or rather the parents, do not pay any enrollment or tuition fees related to the education of their sons and daughters, despite being a private school and seeking to offer quality education to this sector, serving students from preschool, primary, secondary and technological baccalaureate. Our educational model is focused on the use and innovation of educational technology applied to teaching-learning environments. The working hours of our institution are from 7:30 in the morning until 6:30 in the afternoon, however, formal classes start at 8:00 am and end at 6:30 in the afternoon. The devices which we use in our institution range from tablets, laptops, smart screens, projectors, computer labs that are located both in specific areas and under device models one by one for students in each of the sections has a model of different technological integration, thus seeking to meet specific needs according to the stage of development of the students, promoting and favoring the development of skills and abilities in the use of technology and increased performance.

We were the first Showcase School certified last year here in Ecuador. This year we are in the second phase of our adventure, following our transformation plan. With more than 500 employees and 7,000 students, our most difficult challenge is how big we are. To overcome this, we used the Microsoft Educator community to train our staff. We also have a strong Technology Information and Communication (TIC) department to provide training and support to administrative and academic staff, students, and parents. Today all staff and students have developed the digital skills needed to successfully use Microsoft Office 365 for online learning. All our hard work left us well-prepared to face the move to online classes during the COVID-19 pandemic.

Cali, Colombia

Colegio Aleman Cali

We are a German school that belongs to a group of more than 140 schools worldwide, including three other schools in Colombia. We have had the pleasure of being a Showcase School for three years already and last year we decided to let our partner schools know about this great program. In December 2019, we met with our fellow school leaders to explain what a great program they were missing out on and they were convinced and have started their journey of becoming Showcase Schools. This has allowed our schools to work better together and share experiences. We look forward to continuing to expand our skills and positive impact with each other, with students, and within our respective communities.

As part of our digital transformation, we chose Power BI to address problems in information management. Our records were distributed among three different areas, generating reports was difficult, and we had little ability to track student and staff performance.

With Power BI, our teachers now have immediate access to a huge amount of information about their students, such as grade history, test performance, and attendance. They can use this information to adapt and improve their lesson plans, refer students for academic reinforcement, and make decisions with agility and precision. For example, by comparing our students’ performance with those from other schools, we identified a need to deepen our approach to teaching writing and were able to quickly make changes to improve that program. Next, we hope to apply artificial intelligence tools to further enhance the analytics offered by Power BI.
Colégio Marista Champagnat

Colégio Marista Champagnat is one of two units in the large Marist Colleges network enrolled in the Microsoft Showcase Schools program. We already used Microsoft tools in the administrative and corporate environment, however, in 2017, we started a training program for the network’s teachers. They went through an intense training cycle so that they were able to support and guide other teachers. After this series of trainings, the school’s teaching staff started to use Office 365 tools and the educational version of Minecraft, Minecraft: Education Edition, to enhance student learning in the classroom. We are already reaping the fruits of success, especially with regard to changing mindsets. The Microsoft Showcase Schools certification inspires the entire organization to continue investing in the use of technologies that improve educational processes.

Colégio Paraíso

In our school, we give wings to creativity, investing in active learning methodologies, educational technologies, and creative learning environments while promoting educational entrepreneurship to ensure meaningful, critical, and enjoyable learning for the student. The promotion of scientific, technological, and social knowledge permeates all our school activities from kindergarten to high school.

In addition to using Microsoft’s Hacking STEM, we take advantage of its other technological offerings, such as the MakeCode platform. This platform teaches programming in a way that appeals to children and young people, so that they understand the fundamentals of computing through the creation of functional programs. Everything is taught by teachers through Espaço Maker (or Space Maker), an area of Colégio Paraíso dedicated to the development of projects that are particularly creative.

Escola Bosque

When we chose Microsoft Education to be our digital transformation partner, we found much more than digital tools. Microsoft’s commitment to improve education is visible and the motivational programs for teachers and even for schools (such as the Showcase Schools program) are very important. All of our teachers are Microsoft Innovative Educator Experts (MIEE) and many either already have or are preparing for the Microsoft Certified Educator (MCE) certification. One of our teachers is also a Minecraft Global Mentor. The result is amazing. All teachers are applying technology to enhance teaching and learning processes, students are engaged, and the student outcomes are better than ever.

Deutsche Schule Medellín

The process of school transformation in Deutsche Schule Medellín has been positive thanks to the willingness and adaptability of all the educational community members. First, the school leaders have been willing to manage the adjustments in infrastructure and to make investments in technology in addition to the consolidation of working groups for the benefit of pedagogical quality. On the other hand, the training of teachers regarding the incorporation of ICT’s in their classes has given satisfactory results; at the same time, the spirit of the teaching staff to appropriate and promote the use of these tools in their teaching work, and all this, with the purpose of serving the mission of training students with 21st century skills.

St Paul's School

St. Paul’s was the first British School to be established in São Paulo and offers an Anglo-Brazilian curriculum, embracing the best of both cultures. As an all-through (ages 3-18) co-educational school, offering the IGCSE and IB courses to pupils, we are affiliated to a global network of top UK Schools through our membership of HMC (Headmaster’s Conference) and COBIS (Council of British International Schools). Almost 100 years old, we draw on our proud heritage as the first British school in Latin America to be recognised as a British School Overseas (BSO) by the UK government. Yet, we look forward with creativity and confidence. Our aim is to be positive agents of change and help our pupils be caring individuals ready to inspire and mobilise those around us to impact the world for the best. Our commitment to broad educational experiences opens many opportunities to pupils who go on to leading universities around the world.

Avgoulea-Linardatou Private School

Our journey began five years ago, when we started to seriously focus on how we could provide our students truly twenty-first-century digital skills and competencies. Now, we have embraced a wide range of impactful Microsoft solutions that are doing just that—from Office 365 to Minecraft: Education Edition and Flipgrid—with Microsoft Teams being just the latest and perhaps best framework for improving the learning experience here.

After just two full school years of using Teams, for example, student marks in key subjects—including mathematics—have increased an average of one to two points. What’s most intriguing is that the pupils who seemed less engaged previously have recorded the highest improvement. Our teachers have also stopped spending time on non-teaching tasks, so they can now fully focus on creating their lesson plans and interacting with their students.
In the past year, we have increasingly digitized our curriculum by equipping all teachers with Microsoft Surface devices and implementing Microsoft Teams in most courses. In a recent student survey, most students rated working with Teams as a “good” or “very good” experience. Extending training to all our educators has been challenging, so we plan to add a digital education coach who can help us expand our skills and integrate technology more efficiently in all our courses. Our goal is to develop a new future-oriented teaching method in which digital tools play a central role so we can better prepare our students for the professional world of tomorrow.

How devices are used:

Microsoft tools used:
Office 365, Microsoft Teams, OneNote, Azure, Surface
Peterborough, United Kingdom

Bishop Creighton Academy

As a Microsoft Showcase School 2020, we have hosted visits from CEO's, IT Directors, principals, senior leaders, computing leads, and teachers from both within our own trust and other schools from across the UK and Europe. For example, we hosted a visit for a group of seven educators from the Netherlands in January 2020. This has enabled other educators to see what our vision for the effective use of technology in the classroom looks like in practice.

The learning curve for us is to be brave. Trust in the products, trust in the support you get from Microsoft and embrace it, because technology is going to be the thing that’s going to unlock our children’s futures and we really need to be on the forefront of that.

Cardiff, United Kingdom

Cardiff and Vale College

We implemented a makerspace to embed new technologies and skills into our teaching and learning. We developed taster (introductory) and bespoke sessions with learner-led, problem or project-based activities using new technologies like green screen, 3D printing, video, virtual reality, and mixed reality. The impact has been huge, with a massive uptake from staff and students really engaging in the sessions.

Christian Brothers Grammar School Omagh

We have been a Showcase school for four years. We use both Microsoft Teams and OneNote extensively and very successfully for teaching, as well as staff collaboration. We also use Teams to host an inter-school professional learning community (PLC) team for religious studies teachers across Northern Ireland.

We lead learning with Office 365 in Northern Ireland and are regularly invited to train or host other schools. We readily share samples of work and training materials, and we host online sessions to support others. We recently achieved full marks in each of the five areas of assessment required for a Northern Ireland Digital Schools Certification.

The way we teach needs to take into consideration everyone’s needs. As soon as we introduced Microsoft Teams into the classroom, we knew we’d found the right tool to help all students collaborate more effectively, lower the barriers to communication, and facilitate dialogue with learners who struggle with traditional teaching methods.

We are also taking advantage of free learning resources through the Blended Learning Consortium, now available to participating UK colleges within Teams via the GO1 app, which supports complex learning formats like SCORM. Not only does this save us money, but it also means that learning content can be delivered to students directly via Teams, whether they are in a classroom or at home.
Exeter, United Kingdom

Cornerstone Academy Trust

As a trust, we work collaboratively across a family of four schools—Broadclyst, Westclyst, Yeo Valley, and Monkerton—using Microsoft Teams in a fully embedded way for leadership, management, teaching, and learning.

Our entire curriculum, back office, and staff systems are contained within Teams, which allows us to remain agile to the varying needs of pupils across each site, as well as to trends and changes in the education landscape. Beyond the cloud-based facilities of Office and Teams, our 1:1 Surface device program for pupils from year two to six across all our schools in the trust allows all learners to digital ink in OneNote; submit assignments via Lens; and respond in a range of ways to learning, using tools such as Flipgrid, based on the task presented.

Marlow, United Kingdom

Danesfield School

Our journey started by requiring every staff member to take professional development classes on the Microsoft Educator Center and then do something differently the next day based on what they had learned. Staff could see the immediate impact on engagement within the classroom, which created a thirst for more knowledge. Our curriculum now uses real-world, problem-solving activities to engage children, which has had a significant impact on outcomes, taking our school from the bottom 10% nationally to top 0.5% in the latest national test results. We are also now an EdTech Demonstrator School for the UK Department for Education and are currently supporting up to 100 schools with their use of Office 365 and Microsoft Teams.

Shared environment, computer lab

Microsoft tools used:
Office 365, Teams, OneNote, Azure, Microsoft Cloud Services, Imagine Academy, Windows 10 Devices, Minecraft, MakeCode, Skype Field Trip/Collaboration
In the past year, we made a giant step into digital learning. At the beginning of the year, we provided all classes with School Data Sync so the teachers could start to work with Microsoft applications and some third-party software. When the COVID-19 lockdown started, everyone saw the benefits of going digital. All the teachers could start with online lessons right away. Our next steps this year are to streamline the use of digital apps to a preferred list that are all ideally connected to Office 365. We have also built a media lab in both of our buildings. We plan to use this to integrate technology into the curriculum by combining multiple subjects into one assignment that students complete by working together using digital tools.

We’ve seen that the “Trojan horse” to infiltrate the castle of indifference and passive attitude towards learning is technology. It can accommodate students with different learning styles and most of the learners feel familiar with it, because it is an indispensable part of their daily life. Learning technology can be converted by an educator into a tool that promotes inclusion, lifelong learning, collaboration, empathy, and community bonding. It contributes both generally to the educational process and specifically, to the cultivation of twenty-first century skills.

When our students use technology, they become actively engaged in problem solving, improve their research skills, analyze and synthesize new knowledge, participate in group-collaborative activities, and develop their critical thinking.

Microsoft is a paramount partner at EPRAMI. We are a vocational school (10th-12th grades – 14-18 years old). Microsoft tools are an important part of our curriculum because almost all our industrial partners use them, and they provide a seamless transition for our students between school and “real life.” We have integrated them in a variety of ways, for example developing communications skills using Microsoft Teams and Stream as a feedback tool to help students improve their ability to deliver presentations and share their work in a team for peer review. The impact on the students has been significant. Students developed strong communication skills and felt far more comfortable doing a technical presentation for an audience. These are skills that will translate into their professional lives by improving their communication in the workplace.
Escolaglobal

Escolaglobal is a group of private schools in Portugal that offer students an interconnected education from nursery all the way through to university. In 2015, we decided to move to a digital-first way of teaching with a Microsoft 365 1:1 solution. Microsoft Teams is now the school’s main communication channel, allowing students to easily collaborate and submit projects, and teachers to grade assignments and answer questions.

Teachers can be suspicious of using new technology in the classroom, but since introducing these tools, there’s been much more interest and willingness to experiment with new things. One such innovation is Escolaglobal’s flipped learning model, where teachers create bespoke video content about a subject and make it available for students to watch via Microsoft Stream before class – enabling them to learn at their own pace.
Exeter, United Kingdom

Exeter College

Serving students ages 16 and up, Exeter College offers certificate and training programs, higher education degree programs, and sixth-form coursework for students in their final years of secondary school. We switched our 8,000+ students over to using Microsoft Teams as a digital hub once in-person school shifted to distance learning in the spring of 2020 and quickly found that it helped our educators continue to incorporate personalized learning into their instruction.

The independence and flexibility students are given in this environment to listen to recorded lessons, come together for discussions, and get their work done based on their own schedules has empowered students to lead their learning more so than in the past. The flipped learning has given the students and potentially the staff something valuable. It’s changed the ownership of the learning, which has been really beneficial.

Dealing with digital devices in some form, is an essential part of today’s reality at home, in the world of work and, inevitably, in the educational sector. Our goal is to actively prepare our students for these changing conditions. In the 2016/2017 school year, we started the widespread introduction of tablets in the classroom, using a bring-your-own-device (BYOD) approach. At the beginning of the school year we offer introductory technology training events on topics such as: registration on the WLAN network; access and setup of Office 365; group function, OneDrive, and Outlook; OneNote; and XMind. Holding these training courses before classes begin helps to ensure smooth teaching and learning with digital devices right from the start.

Microsoft’s products have been utterly invaluable to us while we have provided remote learning. We are so pleased that our staff had been given development opportunities on use of Microsoft Teams and OneNote before the COVID-19 pandemic hit. While we look forward to getting back into the classroom next year, use of these platforms is now more embedded and will continue to be significantly higher than before the closure.

Behind the scenes, we’re moving away from our multifarious management platforms and are now managing all devices through Azure with Intune. All Windows 10 devices will run through Intune from the start of the next academic year. We’re really excited about the performance and accessibility improvements this will bring, and how we’ll be able to use the company portal to enhance our Windows 10 bring-your-own-device (BYOD) offering, particularly for students.

Etten-Leur, Netherlands

Katholieke Scholengemeenschap Etten-Leur

We believe it is important that our students are well prepared for the future. Digitization plays an important role in this. With a laptop, it becomes even more possible to match the pace and level of the student. We have opted for a blended learning approach that combines both books and digital resources. This approach offers more possibilities for a tailor-made education, as well as more diversity in course offerings and ways of working.

We believe that variety in class ensures that students learn better, and that learning is more enjoyable. We are introducing the Microsoft Imagine Academy as one of our projects next year. We are also interested in exploring how to integrate artificial intelligence and chatbots into our curriculum.
Deventer, Netherlands

Kindcentrum Rivierenwijk

Our school is a forerunner in the use of computers and other digital resources. We make didactic choices in which information communications technology (ICT) always has a place. We guide our teachers in the application of ICT and they share knowledge with each other using the TeachKRACHT method. All our teachers now teach lessons with the most modern tools. Each classroom has a full HD touchscreen and a tablet for each child that can also be used as a learning tool together with the screen.

When we face technical difficulties, the Microsoft Innovative Educator Expert (MIEE) and Showcase Schools networks are there to help us. We are looking forward to a new year of participating in the network while learning from other schools and letting other schools learn from us.

In 2017, Microsoft was recognized as our school’s single virtual learning environment. Staff were invited to apply for a set of “digital leader” positions, received extensive training on the Microsoft platform, and were then assigned a group of six to seven colleagues to mentor and support. This collaborative approach not only increased leadership capacity among staff but created a very supportive culture around using digital technology.

In 2018, a trip to the Microsoft DreamSpace in Dublin inspired us to try to create a similar Digital Hub on our school campus. This space acts as a breakout room that teachers and students can use to work on group projects using Surface devices. It has also been very useful for our coding students at junior cycle and our senior cycle computer science students.

We believe that the heart of our school’s model should be sustainable innovation. This is not just the creation of separate, isolated methods or ways of teaching, but the ability to systematically convert ideas into new offerings that alter the very context of the educational process. Our school, like most schools in Lithuania, has an established hierarchy of educational subjects – first, mathematics and languages; followed by humanities and social and science subjects; and finally, art, music, drama, dance, physical education, and technologies. There is some space for balancing the importance of these subjects because we need to think about intelligence differently. Intelligence is dynamic, interactive, and inter-disciplinary.
When the COVID-19 crisis and quarantine started, we proved that using Microsoft Teams for pedagogical continuity was the right solution. So before students returned to classes in the fall, we trained new teachers on Teams and made sure that the "veterans" were trained on any new features. This way every class was engaged on Teams at the beginning of the year and prepared to switch partially or totally to distance learning. We use a hybrid learning model where students work at home using Teams to view courses, video, audio, pictures, etc., and then complete the work in the classroom with the teacher present. Using Teams also provides us with an easier, less formal, more efficient way to facilitate discussions that deepens relationships in the classroom, which is a benefit for all of our students.
Thessaloniki, Greece

Mandoulides Schools

Mandoulides Schools have been selected as a Microsoft Showcase School for four consecutive years (2016-2020). Our plan is based on our holistic transformation vision, oriented in all four pillars of the Microsoft Education Transformation Framework.

We have been utilizing technology as an indispensable tool to transform the learning process into an interactive and creative experience for every student. Every student in our school—from day care to high school—has a Microsoft 365 account. We use Microsoft Teams as a hub for asynchronous and synchronous education. One of the features that we’ve found very useful is that we can integrate the class OneNote notebooks that students use throughout the year and create quizzes for formative assessment.

Milton Keynes, United Kingdom

Milton Keynes College

The vision of Milton Keynes College is to be known for our innovative use of digital technology and with this aim, there is an expectation that staff and students have the digital skills to work and learn efficiently and innovatively via the appropriate use of this technology.

We have been working closely with Microsoft UK, KPMG, City and Guilds, and a host of tech partners to develop an Institute of Technology based in Bletchley. We’ve built a personalized learning bot, integrated in Microsoft Teams, to improve math and English learning outcomes. The teacher creates an assignment with several specification points attached. If the learner doesn’t achieve those points, the bot will send them new content on those topics. They gain badges for completion and the bot follows up with the learner to close the feedback loop.

Myddelton College opened its doors to students at the start of September 2016 with a particular aim in mind: to truly prepare young people for life and work in the twenty-first century. Our vision was for a child’s educational experience to resemble a modern workflow, a much more collaborative exercise than a traditional education delivers, between pupils themselves and between pupils and their teachers.

We equipped every child and teacher with a tablet device and an Office 365 account. Every single lesson is taught through OneNote and we use the application imaginatively to allow teachers and students to work collaboratively on their learning, modeling modern workflows. Teacher feedback can be instant, shortening the teaching cycle of plan-teach-feedback so that students get to adapt their approach to learning rapidly. It’s safe to say that using OneNote has utterly transformed the way we teach at Myddelton College.

Newark Hill Academy

When we started our digital transformation, our leadership used the Microsoft Education Transformation Framework to create a baseline of where we are at and where we want to go. Our Digital Transformation Action Plan was designed and written by the leadership team and the teaching staff. This has been key to have full buy-in with all staff to our vision and promotes consistency regardless of the area of school, giving both younger and older pupils the same digital experiences.

The most up-to-date version of our action plan is on Microsoft Teams so all stakeholders can reaffirm the targets and see how it is developing when needed. It is shared and discussed with staff to ensure they have ownership in our shared vision. Using technologies has also been built into the professional development records of our teachers and teaching assistants.

We have a two-pronged approach regarding information communications technology (ICT) implementation. On one hand we work with an ICT roadmap which states which digital projects will be carried out in which groups and at what times. On the other hand, we try to use ICT in the most targeted way possible to increase learning efficiency and improve classroom management. Functional and reasoned use of ICT puts a tailor-made education within reach of each student. This perspective also facilitates learning based on knowledge construction and the theory of multiple intelligences. All our classes have digital whiteboards and many of our current teaching methods use interactive whiteboard software, which allows us to visualize the lessons on the board for the students.

Queen Anne High School

Before we engaged with Microsoft, our use of technology was very disjointed across the school. Now we have implemented a flipped/blended learning model across the curriculum focused heavily on the use of Microsoft Teams, OneNote, and Forms. The biggest challenge we face in the coming year is the current economic climate within our Local Authority. With budget cuts being made, we need to make the best use of the technology we have and spend wisely. We encourage all students and staff to download the full Microsoft Office Suite available free through Glow, Scotland’s digital learning platform. Glow and cloud-based applications ensure equity for all as they can be used on any device in or out of school, ensuring that no pupil is left behind.

Repton is 100% committed to preparing the Class of 2030, today. Recent events—most importantly our successful transition to remote learning during the COVID-19 lockdown—have only emboldened us to achieve our vision, using Microsoft technology to support individualized, socially, and emotionally attuned learning.

We have seen that the more technology is embraced in teaching and learning, the more time educators have to focus on what matters. We want to extend this to our supporting infrastructure and establish automations to manage the school admin in a smarter manner. We have created an assessment system which helps us track and tailor the learning of our students in Power BI. We intend to push that further to aggregate that data with other social and emotional data to render our pupil management even more responsive and insightful.

Ribblesdale High School

We use Microsoft Teams as a digital hub to support teaching and learning throughout our curriculum and to develop the independent learning skills needed to succeed in the twenty-first century. Our pupils and staff regularly use a variety of tools to support the learning process, such as OneNote, Teams, Sway, and Minecraft: Education Edition. We were recently awarded the status of a UK Department for Education Demonstrator School, where we provide free advice and training to help schools and colleges use technology to support remote teaching and improve digital capability.

The future will hold many different challenges in many different forms, some that we cannot yet predict. However, Ribblesdale is in a strong position as we move forward. With our use of technology and systems currently in place, it allows us to be flexible and adaptive to anything the future may hold.

Our school is always asking itself the question: “How can we prepare the children entrusted to us for a digital world and how can we ensure that we as educators do not lose touch?” To achieve that, we have transformed traditional classrooms into modern learning spaces equipped with the latest educational technologies. All our students and teachers use Microsoft OneNote class notebooks, Microsoft Teams, and Outlook. From 9th grade onwards, students use OneNote exclusively, with a separate class notebook for each subject, managed by their teacher. We also use an inverted teaching model where 9th and 10th grade students develop new content outside of the traditional classroom environment using a web-based learning platform and then apply it collaboratively in the classroom.
Poio, Spain

SEK International School Atlántico

Our school changed from traditional classrooms to open learning spaces more than a decade ago, when we were the first school in our region to open a makerspace. We also believe in the philosophy that “any space is a learning space,” so we encourage students to find the learning path that is best for them. The impacts we’ve seen from this approach include enhanced interdisciplinary and hands-on learning and the introduction of new learning activities (e.g., robotics). We also have a robust social and emotional learning (SEL) program. During the COVID-19 pandemic, we used Microsoft Teams to conduct SEL webinars for students, parents, and teachers that were a big success.

Our advice to other schools? Take it step by step. Have a plan; pilot it; train students, teachers, and families; and be as transparent as possible.

We started our Microsoft Teams trial in September 2018, and feedback from staff and students was overwhelmingly positive, particularly around how this had improved engagement of students. We made the brave decision to move the entire college away from Moodle and into Teams and Office 365 for the 2019-20 academic year.

Our key to a successful transition was a well-thought-out change management strategy that focused on people, and the things they do, rather than the technology that supports them. That included an extremely comprehensive training program consisting of six hours of face-to-face basic training for all staff, plus extended “masterclasses.” We managed Teams centrally through PowerShell to give departments flexibility in how they structure their delivery. Membership of teams is linked directly to our Learning Management System, encouraging better management of data. The learning curve was steep, and not without challenges. But it’s been very manageable, with great support from Microsoft.
Derry, Ireland

St. Mary’s College

We really value our Microsoft Showcase School status and feel it is a privilege to be a part of this exclusive, global community. Our students have been using Microsoft tools for many years now and are extremely competent in their use. The tools are seamlessly integrated into learning and fun activities for the students, which has had an impact on achievement and standards. We perform well above the average benchmark for similar schools in Northern Ireland. We develop not only our students to be future-ready but also our entire staff.

This year we carried out extensive outreach work to local primary schools, training and supporting both the students and teachers in delivering a computing curriculum. Primary schools were able to book a fun and informative training workshop where they learned about various elements of computing through play-based learning techniques.

Treorchy Comprehensive School is situated in the Rhondda valley in the heart of the old Welsh mining community. There are currently just over 1,600 pupils, of whom around 25% are entitled to free school meals. Around 40% of our pupils live in the most deprived areas in Wales. The school prides itself on being a community school committed to excellence.

We have made a significant investment in technology to support excellent pedagogy, improve pupil outcomes and improve staff work/life balance. We have been a member of Microsoft Imagine Academy since 2013, which has allowed both staff and students access to resources to develop their skills and gain industry-recognized qualifications. Having been a Showcase School since 2015, we have supported many other schools in developing their use of digital technologies.

Wellington College

Founded in 1853, Wellington College has a tradition of innovation. In recent years, we have brought technology into the classroom, empowering students to learn in a completely new way. From introducing OneNote to providing every student and teacher with the latest Microsoft Surface devices, we have made education more collaborative, efficient, and immersive.

Our digital transformation has reduced the time burden on IT, as well as costs for IT management, servers, and other hardware. It has also transformed how our educators teach. By using the same handheld devices as their students, they can create a collaborative, flexible learning experience. Firewalls set up by the IT team mean entertainment functionality is restricted, so learning takes place in a distraction-free environment. Students are doing their work faster, and teachers can mark it more quickly as well.

How devices are used:

Amesbury is a co-educational, independent day prep school that uses digital technology as a tool to enable independence, encourage curiosity, develop collaboration and facilitate access for all. We recognise that our pupils are growing up in a digital world and believe that their school life and the way that they learn should reflect that. We aim to model a balance of using digital tools and resources alongside more traditional ways to learn, so that our pupils acquire lifelong learning habits and the ability to use digital tools effectively. We are proactively building 21CLD into our entire curriculum; not only the academic subjects but also in the Arts, on the stage and on the Games field. We seek to provide opportunities for our pupils to work with others within and beyond school, learning teamwork and taking joint responsibility for outcomes. Using the Microsoft Education Transformation Framework, we are on a continuous journey to develop our effective use of digital tools across the whole of school life. Digital tools have revolutionised teaching and learning for our staff and pupils, empowering everyone.

Bridgwater & Taunton College

Bridgwater & Taunton College (BTC), is a Further Education college based in the heart of Somerset, England, with main centres in Bridgwater, Taunton and Cannington. BTC offers full time academic and vocational programmes including A-Levels, T-Levels, BTEC and the International Baccalaureate Diploma Programme. Its courses range from Entry Level through to Higher Education, in addition to part-time, commercial and distance learning. The courses combine real-world experience with academic rigour and fantastic employability. BTC has strategically placed itself as the region’s leading provider for technical and professional training, with our recent Ofsted inspection awarding the College Outstanding in Apprenticeships. We work in collaboration with a large number of local and national employers to train the next generation of professionals, combining leading edge practice with a wealth of opportunity and development. We believe in the ability of each of our students to fulfil their potential and become the best they can be. We do this by offering a broad and diverse range of subject and qualifications to suit the needs and learning styles of all our students. The College has an excellent reputation both regionally and nationally as a highly successful provider of education and training.

Clayton Hall Academy

Clayton Hall Academy is a truly comprehensive 11-16 school in Staffordshire. Clayton Hall Academy has just under 900 students, of whom, 24% are classed as Disadvantaged, 11% are EAL (this figure is rising year on year), and 9% are on the Special Educational Needs register. The make up of our school has changed over the last few years with a rise in the number of disadvantaged and looked after children, alongside an increase in EAL students. Next year’s cohort of students continues this trend.

Colchester, United Kingdom

Colchester High School

Over the past 140 years Colchester High School has built up a reputation for providing an excellent all-round education whilst preparing our pupils for life beyond school. Today that reputation still stands. Through our inspiring teaching and forward thinking STEAM curriculum, we build in our pupils, ages 2 to 16, the confidence, self-belief and strength of character to achieve their full potential whilst nurturing in them a global perspective and a mindfulness for social responsibility which will last throughout their lives. It is a community focussed on “Building a Bright Future for All” The six key factors that combine to set our private school apart are: Academic Success, a focus on Character Development, a Global Education, A STEAM Curriculum, A Digital Education and an Individualised Approach.

Colegio “Madre Asunción”

Madre Asunción School is defined as a Catholic confessional school, created and animated by the Congregation of Carmelite Sisters of the Sacred Heart of Jesus in accordance with the spirit and will of the foundress, Mother Asunción Soler. Its motto was “Seek the Glory of God” and the permanent proclamation of God that constitutes our fundamental service to the church and society through education. Our vocation guides us to “show evangelical solidarity” with the poorest and to commit ourselves to doing our bit so that the person may find the true freedom of the children of God. Our School has the mission of: “To educate the person integrally from a Christian philosophy, presenting Jesus and his message as a project of life and Mary as a disciple of Jesus and model of fidelity to the Word of God.” Our purpose is concretized in: “To form new generations that with their example transform the world according to the values of the Gospel.”

Sevilla, Spain
Colegio Internacional de Sevilla San Francisco de Paula

Looking into the future we design an education adapted to each student and open to the world. We have 135 years of tradition of progress. The school stage is the foundation on which the lives of our students are based and we face the challenge with the responsibility and commitment to the future that this entails. During this successful trajectory, more than 18,000 students have studied in the classrooms of the School, where they learned the principles of respect and hard work, which are fundamental hallmarks of an educational project that is open to the world and to the coexistence of different ideas. It is the only private school in Seville that has maintained its original location in the historic centre of the city, it was the first and the only one at the time to renounce public subsidies, and it was also one of the first to admit female students, in the 1930s. It is traditionally one of the best schools in Seville in terms of academic results of its students. Our concept of the student as a person led us to opt for the programmes of the International Baccalaureate and subsequently the status of foreign center, which gives us the freedom to decide, design and implement which solutions are the best for the different challenges that these times pose. We educate under an ideologically independent model, guided by our motto “Respect and Work”. Seven student-centered objectives structure the educational project at our Center.

Püspökldány, Hungary
Erőss Lajos Református Általános Iskola

As the only church-maintained school in Püspökldány, Erőss Lajos Református Általános Iskola uses Microsoft technologies to digitally transform its school and to build a 21st-century learning environment. A learning community is built through knowledge sharing within the faculty, working groups, and working communities to implement these tools into the school’s curriculum. Teams is the primary tool to support this learning process to host and organize support and training sessions. The digital transformation has already begun with numerous events organized through Sway and Teams, including Folk Tale Day, CodeWeek, the Digital Device Development Foundation Raffle, Wass Albert Reading, Career Orientation Day, Strong Week, and Digital Collections. Additional Microsoft 365 tools are used to support learning and innovation skills across students and staff.

**Farndon Fields Primary School**

Farndon Fields Primary School was opened in January 1969 and is set in extensive grounds on the southern edge of Market Harborough with beautiful countryside views. We have approximately 330 pupils on roll and are growing! We have our own pre-school, which is housed in a modern, purpose built, modular building on the school site. The main school building houses six classrooms and we have a brand-new extension, separate to the main building, that houses a further eight classrooms. There is a large assembly hall, an IT Suite, a central library area and several areas around the school for small group work and activities. We also have our own kitchen which provides a varied menu for school lunches. Our impressive grounds are used for sports and other curriculum activities throughout the year. We have a nature area and a small allotment, an outdoor classroom area and a sensory garden. We are currently hosts to a beehive showing our support for biodiversity and the food chain, and we have a small piece of land that we hope to develop for forest school learning opportunities in the future. All members of our school community are encouraged to take pride in the school and further enhance the appearance of our grounds.

Malacky, Slovakia
Gymnázium Malacky

Our gymnasium was and is the only state secondary school in Malacky. Therefore, the vast majority of teachers, doctors, lawyers, economists, engineers... in the entire region are graduates of our school. This is the biggest and most important contribution of our gymnasium to Malacky and its wider surroundings. Today, our school has a huge capital. Excellent teachers and great students. Huddersfield, United Kingdom
Huddersfield New College

Huddersfield New College is a sixth-form college in the Pennine Hills above Huddersfield, serving students from across the Kirklees and surrounding regions. We provide an inclusive, enriching education where each and every young person can achieve their vision – whatever this may be. We believe that there are no limits upon what our young people can achieve when they are supported, challenged and guided by our passionate educators. We have a wide and varied curriculum covering A Levels and Applied General qualifications, supporting a wide range of progression opportunities. Our aim is to challenge our students to be the best that they can be, and under our outstanding guidance, teaching and wider support we will ensure that they succeed, and are ready for the world – whether this will be university, an apprenticeship or work.

Harrow, United Kingdom
John Lyon School

Together with our prep school, Quainton Hall, we proudly serve families on the Hill, around Harrow and further afield by offering a world-class through-school experience to girls and boys between 3 and 18 years old. John Lyon is a happy and thriving community that embraces technology and put it at the forefront of all that we do. We are proud to have been recognised as an EdTech leader, using Teams and OneNote throughout the school and in our Digital Learning lessons. We integrate areas such as games design, web design and app design into our curriculum. Our STEAM facilities allow our pupils the opportunity to use cutting-edge technology in a broad range of ways. Pupils compete at VEX Robotics competitions locally and nationally. We also have a dedicated Head of Music Technology and our AV equipment is akin to what professional TV producers use. Pupils are very much involved with our AV provision, setting up, shooting and editing content.

Kibworth CE Primary School

Kibworth CE Primary School is a consistently high performing, well respected school. It is a large Primary School, set in rural south Leicestershire, with 597 pupils currently on roll. Our school vision is Let your Light Shine and we believe that technology enhances the opportunities for our children to do this. The use of technology has been embedded into our school culture for the last 15 years and we strive to ensure our pupils’ learning is both inspired by and enabled by it. We were appointed an Ed Tech Demonstrator school by the Department for Education in 2019. This has allowed us to develop our use of Ed Tech, whilst sharing our expertise and supporting schools across the country on their transformational journeys.

Glasgow, United Kingdom

Marr College

Marr College is a public funded secondary school in Troon in South Ayrshire with around 1,100 students. We have high expectations for all our young people and strive to create a vibrant and successful learning community where everyone feels valued and included. We are very proud of our school and the success of all our young people. We celebrate this with the community in many ways, including our website, via twitter @MarrColOfficial, local press and in our termly newsletters. We have used the ‘Education Transformation Framework’ to help identify our areas of strength but also to identify where further improvement could be made. We were delighted to join the Microsoft Incubator Programme this year which has allowed us to self-reflect and develop our strategic vision. We are fully committed to continuing our digital transformation journey and developing the digital skills of our staff and students.

Middlesbrough, United Kingdom

Middlesbrough College

We’re a College that is unique to the region, delivering courses in every occupational sector area and at every level, from entry level all the way through to level 7 postgraduate qualifications. We are a positive and ambitious College, with a strategy to continue to expand our offer and invest in our £100m campus. Since relocating to Middlehaven in 2008, we have continued to develop our outstanding facilities including our sixth form centre, MC6, and £20m STEM Engineering Centre. Our apprenticeship and training company, Northern Skills Group works with over 2000 employers in the North East and Yorkshire delivering over 100 types of programmes. Our experienced team have trained over 2,200 apprentices putting us in a strong position to help shape the economic landscape of the region. We have recently entered a ground breaking partnership with The Open University, bringing affordable degree study to students across the Tees Valley. The Open University shares our ambition to deliver flexible learning that equips students with the skills and knowledge that employers need. It means that we can offer job-focused, shorter in duration and more cost-effective higher education. Education has a huge impact on people’s lives and Middlesbrough College is passionate about enabling people to achieve their goals through high quality training.

Mowmacre Hill Primary School

Mowmacre Hill Primary School is situated on a housing estate on the outskirts of Leicester City – the area has many challenges and sits within the top 3% of deprivation in the UK. Our community faces poverty with the many social constructs that accompany this. Age Range: 3 – 11     Gender: Mixed We have 391 pupils on roll, ranging from 4 – 11 years. 45% of our pupils fall within the Pupil Premium category, which entitles their families to additional financial support from the Government. 41% of our pupils also have special educational needs, all of which require additional support to support their academic and social and emotional development. 13% of our pupils also have been awarded Educational Health Care Plans that demonstrate long term support from outside agencies and educational professionals. At Mowmacre Hill Primary School, our vision is to create a primary school that encourages its children to question and discover for themselves. Questioning and discovering their personal potential, their responsibilities in the Mowmacre school family, the Mowmacre community and as international citizens. We aspire to help each child to realise their potential to become successful learners, confident individuals, responsible citizens, effective contributors, and curious young people who are confident to challenge the status quo.

The Oaks Specialist College

The Oaks Specialist College is a specialist college for 18-25 year olds with learning difficulties in Kent, East Sussex and surrounding London Boroughs. All of our learners have an EHCP (Education and Health Care Plan) stating their requirement to access a Specialist provision. We treat our learners, not only as individuals, but as young adults who benefit from specialist input, education and coaching (typically for one to three years), to help them on their path towards independence and, wherever possible, employment. Our learners experience high quality specialist teaching alongside use and applications of various digital and assistive technologies to ensure that each young person who leaves has the ability to be autonomous in their independence.

Old Bawn Community School

Built in 1978, Old Bawn Community School is a community of learning and personal growth, which includes our students and their families, our teachers and staff. The school has thrived on providing a holistic and inclusive education for young people in Tallaght for 44 years. Now in 2022, we have in excess of 90 teachers and SNAs and over 1000 pupils. Our students are a dynamic mix of different cultures, ethnicities and genders from a wide variety of backgrounds. We work hard to ensure that our students are happy coming to school each day and firmly believe that academic success can be achieved once a sense of belonging has been established.

Osnovna škola Zorke Sever

We have been implementing 21st century learning design at Zorka Sever Elementary School since the very opening of the school, on September 1, 2018. Out of a total of 497 students, 17% are students of the Roma national minority. Students are fully involved in all activities at school, inclusion is carried out at a high level. The beauty and strength of our school is also in the students in special classes and educational groups who are also involved in all activities at our school. We respect diversity and treat each other with great respect, understanding and empathy. Our school was selected for the pilot project School of the Future as one of 60 schools in the Republic of Croatia. All 60 teachers of our school receive regular professional development at the Microsoft Learning Center. In the last school year, our school received the status of Microsoft Incubator School. We regularly attend the online education Digital transformation of Microsoft schools in 2022. I believe that we will be able to obtain the status of Microsoft Showcase School during this year. I motivate and encourage teachers in my school to join the MIEE community because the vast majority have earned it through their work. In this school year there were 9 of us, I hope that number will increase.

Isle of Sheppy, United Kingdom

**Richmond Academy**

Richmond Academy is a large primary school, from Nursery to Year 6, based on the Isle of Sheppey in Kent and has been part of The Stour Academy Trust since January 2017. We are significantly above National average for Pupil Premium, based in most deprived area of Kent with a high percentage of SEND. Traditionally at Richmond engagement and behaviour have been the biggest barriers to learning, this led to historical mobility for staff, which had made teaching and learning standards and experiences for children difficult to maintain. In March 2020 we moved over to Office 365, so by the second lockdown we were able to teach live lessons to all our KS2 children and pre-recorded lessons via Stream to our KS1 and Early Years children. After we all returned to school, as a Trust, we recognised the importance of digital skills and how they could positively impact teaching and learning for all.

Sir Thomas Boughey Academy is a welcoming, inclusive school in Stoke-on-Trent in Staffordshire. Our 575 students come from a diverse range of backgrounds and cultures. We are part of the United Endeavour Trust, and work closely with the other academies in the Trust, Newcastle Academy and Clayton Hall Academy. Our Digital transformation journey has drawn on the skills and experience of staff in all three academies to form a Digital Transformation Working Group that leads on all aspects of the digital transformation of the three academies. This Trust-wide vision is common to all three academies, but this Sway focuses on the journey at Sir Thomas Boughey. Sir Thomas Boughey Academy has just under 600 students, of whom, 24% are classed as Disadvantaged, less than 1% are EAL, and 10% are on the Special Educational Needs register. There has been a rise in the number of disadvantaged and looked after children over the last 3 years, and next year’s cohort of students will continue this trend.

St. Augustine’s National School Clontuskert

St. Augustine’s National School Clontuskert has been a Microsoft Showcase School since 2015. We are a small, rural school in Co. Galway, Ireland. In September 2022 we will have an enrolment of 52 pupils. We have three classroom teachers, two Additional Education Teachers and two Additional Needs Assistants on staff. The school demonstrates thought-leadership in building a school-wide vision as the starting place for a holistic digital transformation using Microsoft’s Education Transformation Framework. Clontuskert strives to enhance students’ learning experiences through pedagogical changes and the effective use of technology. Students need skills for life and work in the 21st century, that are not always well developed through traditional education.

**The Ladies College, Guernsey**

The Ladies' College, Guernsey has a strong belief in educating its students for the world of the future. We are also a girls school, committed to closing the gender gap, and aware of the responsibility on educators and leaders to ensure that equal representation is needed in the technologies that shape our world. The school has a clear vision of where it wants to be, which is supported by the staff, governors, and senior leadership team. To achieve this vision, the school has developed a digital strategy that is inclusive in its overall development plan with a focus on providing its students with Future Ready skills. By partnering with Microsoft, the school was able to access a wide range of support and resources that made digital transformation possible while helping its teachers achieve MIEE certification. This has also helped the school provides students with 21st Century Learning using digital technology to create sustainable change, drive positive impact, and ensure student success with Future Ready skills.

United Lisbon International School

United Lisbon International School was founded to provide English-language based international education in Central Lisbon. The school is open to students in Pre-K (Early Childhood) through Grade 12 of all nationalities, gender, and religion. The school opened in September 2020 and has about 150 students from 23 different nationalities. The curriculum, while based on US Educational Standards, and taught in English, values an international perspective in its learning materials and activities, and strongly supports the acquisition of Portuguese language, and an understanding of the host country history and culture. The extensive educational program is further extended by the integration and appropriate use of digital resources and is enriched by a wide-range of co-curricular activities and community connections.

Waregem, Belgium

VTI-Waregem

There is a fresh wind blowing through the Sint-Paulus comprehensive school. Yes, you read it correctly: after 20 years we are working even more closely together with all the schools of the Sint-Paulus Comprehensive School in Waregem, Anzegem and Avelgem, from one vision and one name. From now on we are the Sint-Paulus School with 6 campuses. In doing so, we are responding to the educational renewal in secondary education that started on September 1, 2019. After an orientating first grade, we offer, as of the second grade, different fields of study from which the student chooses a field of study. Our study domains: Language and Culture; STEM; Art and Creation; Economy and Organization; Society and welfare; Sports. A new wind is blowing through the offerings of our schools. We are anchoring our cooperation by presenting ourselves as one school. Our campuses not only fall under the responsibility of one school board, but they are also steered by a dynamic management committee led by the coordinating director.

Canterbury, United Kingdom

Water Meadows Primary School

Water Meadows is an established Primary School in the rural village of Hersden, just outside of Canterbury. Currently, we are moving from a mixed-form entry to a one-form entry school, ranging from EYFS (Early Years Foundation Stage) to Year 6 with an above average number of pupils with special educational needs and FSM (Free School Meals). The pupil role is now growing steadily, with over 40 children joining the school since October 2021, which has made teaching and learning standards and experiences for children difficult to maintain. As a Trust, in March 2020 we moved over to Office 365, so by the second lockdown we were able to teach live lessons to all our KS2 (Key Stage 2) children and pre-recorded lessons via Stream to our KS1 (Key Stage 1) children. After we all returned to school, as a Trust, we recognised the importance of digital skills and how they could positively impact our teaching and learning.

Exeter, United Kingdom

Westclyst Community Primary School

Westclyst Community Primary School (WCPS) opened in 2016, and its first pupils began their education in temporary accommodation at Broadclyst while the state-of-the-art school building was constructed. The ‘outstanding’ Ofsted report it achieved at its very first inspection in 2019, before its move to permanent accommodation, is a testament to the dedication of its teachers.

Woolden Hill Primary School

Woolden Hill Primary School is a well-respected community school for 3 to 11 years olds. The school has 235 pupils on roll. The proportion of pupils who have special educational needs is 17.6%. The proportion of pupils in receipt of pupil premium is 18.5%. Woolden Hill pupils are predominantly from White British backgrounds, with 3% EAL pupils. The school is one of 15 schools within the Discovery Schools Trust.

Yeo Valley Primary School

Yeo Valley Primary School (YVPS) was founded in 1900, first as a recreation centre for the nearby textile factory, then as a wartime hospital and later a boys’ secondary modern school before being established as a primary school in the 1970s. Still very much a community school, with its own nursery, YVPS accommodates 230 children from the surrounding area, aged from 2 to 11. YVPS is part of the Cornerstone Academy Trust, a multi-academy trust that provides 21st century education as well as professional teacher training through the Cornerstone Teaching School and has developed a local, national and international reputation for its innovative use of IT and digital media.

Budapest, Hungary

Zuglói Herman Ottó Tudásközpont Általános Iskola

Our school turned one hundred years old in the 2011/2012 academic year. The centenary was both a celebration and a milestone for us. As a partner-oriented school, we researched. Based on several years of successful joint work, in August 2016, Microsoft asked our school to be the lead institution for their innovative school program. Since then, we have been organizing school visits every year for schools interested in our digital transformation. During the pandemic, we held the show online. As a Showcase School, we shared our experiences at several conferences...2011/12 academic year, we joined Microsoft’s “Innovative Schools” program, and in 2013 we were the first among Hungarian schools to receive the “Innovative School” title, showing how we can best support the development of our students, meet the expectations of families, our sponsor, and our own needs. We wanted to build a school in which the development of learning and innovation skills (4C) is given the same role as learning the curriculum. Therefore, in 2012, we modified our pedagogical program, in which we formulated our most important task: to lay the foundation for the next hundred years of our school by building a modern, 21st century school.

Christel House South Africa (CHSA) students come from impoverished areas. Our challenges include lack of infrastructure and devices in students’ homes, high data costs in South Africa, and a struggle to get education websites zero-rated. With the support of our head office and generous partners, CHSA was able to fast-track to a blended learning environment with the rollout of devices and data. Students are now empowered and motivated to use technology for learning. Staff professional development remains a priority through programs such as the Microsoft Educator Center. CHSA has also established character and career development programs, which further contribute to staff and student success.

Steyn City School

One of our main areas of expertise is virtual reality (VR) and augmented reality (AR). We are piloting three XinaBox projects using Azure AI to develop future-ready skills amongst our students. They do the coding and learn more about data capturing and analytics as well as how to use AI to make future predictions. During the COVID-19 lockdown, we used Minecraft: Education Edition in innovative ways to host assemblies and a virtual science fair.

The fact that our teachers and students were familiar with Microsoft Teams and OneNote made the transition to remote learning seamless. Students could log in from home from any device. The fact that several apps are already embedded in Teams made it easy for teachers to try out new learning tools in a low-stress way.

Bryandale Primary School

Bryandale Primary School is a vibrant, progressive public school situated in Johannesburg, South Africa. A key strategic imperative is the inculcation of Bryandale’s values, with this becoming more important as we prepare our children for the 4th Industrial Revolution. Solid social-emotional skills are crucial for our children, as they will need to function in a highly adaptive, dynamic environment. Another key strategic imperative is sustained educational excellence. We are pioneering innovative, student-centered learning, supported by digital technologies, to equip our children with 21st c skills, preparing them for success in the Knowledge Economy.

Corona School Gbagada

Corona School Gbagada was founded in the year 1956 and ever since has continued to do what we do best: giving excellent service to generations. Corona School Gbagada is a warm and welcoming place where children feel loved, cared for and are comfortable enough to take risks with their teams and push themselves. As a school, our focus is on the children, treating them as individuals and offering them learning experiences which are memorable and allow them to develop skills to cope with the dynamic world around them. We look to develop the total child and pride ourselves on the fact that we see each child as unique, with their own strengths and personalities. Children who pass through this institution master fundamental academic skills and progress through a challenging and relevant curriculum to achieve scholastic and personal success. Our Reading Progress is a great tool used in the School to enhance our children's reading skills. Prior to the year 2019, we had been using technology as a tool in our classrooms through our Bring Your Own Device (BYOD) program, however, our technology journey with Microsoft kicked off fully in the year 2019, when other applications were introduced for our upper primary pupils to accommodate seamless virtual and hybrid classrooms during and after the Covid-19 lockdown. Continuous Learning with the various Microsoft applications such as OneNote for schoolwork, collaboration on OneNote class notebook and virtual classes on Teams all enhance virtual and real time learning in Corona School Gbagada. We are a team of highly qualified, passionate, committed, and experienced educators who are well versed in providing outstanding learning opportunities, care and support that will bring out our children’s potentials. Our children are our future, and our aim is to ensure they can make full contribution to a future global community. Our school ethos is based on consideration, courtesy and respect for others to equip our children to have the confidence and ability to enjoy a fruitful and successful life which was learnt basically from our weekly character-building programme.

Alexandria, Egypt

Victory College, Alexandria

Victoria College, Alexandria, was founded in 1902. During World War II, many displaced European royals and nobles studied in Victoria College. Former Bulgarian King and Prime Minister Simeon Saxe-Coburg-Gotha attended classes along with schoolmates such as King Hussein of Jordan, Zaid Al Rifai, the Kashoggi brothers (whose father was one of Saudi King Abdulaziz’s physicians), Kamal Adham (who ran the Saudi external intelligence directorate under King Faisal), scholar Edward Said, present-day Saudi businessmen Mohammed Al Attas, Ambassador Mohamed Faqi and Ambassador Fouad Shubiksha brothers [4] and Ghassan Shaker —Internationally famous director Youssef Chahine, and actor Omar Sharif and many Princes from the Libyan Royal family and the Jordanian Royal Family. Recently, the Ministry of education and National institutes administration works to develop and level up the education in Victoria College by embedding modern technology in education which was highly supported by creating office 365 account for each student and teacher and by taking the decision of establishing teaching with technology unit in every school.

Ajanta Public School

Ajanta Public School, Sector 31, Gurugram (A MICROSOFT SHOWCASE SCHOOL) caters to the inherent aptitude, skill-sets and talents of every student and structures its curriculum framework on numerous broad-based objectives. Being in the heart of the city built on 25 acres of land; it has fine infrastructure which supports appropriate, academic, technical training and all sports training. All aspects of 21st Century Skills are intricately embedded into the curriculum framework. Being a Microsoft Showcase School, technology is the brick and motor of the teaching methodology. Students are trained in getting a hang of various, latest technical applications. Impetus is given to innovations in Artificial Intelligence and Coding by the students. A scientific thought process is inculcated in the students through continuous endeavours. Emotional balance and healthy mind are prioritized; wherein time to time counselling through school counsellor, clinical psychiatrists and experts play a major role. Activities based on strengthening the life-skills is regularly taken up in parity with various subjects.

Field Trip/Collaboration
Delhi, India

ASN Senior Secondary School, Mayur Vihar

ASN emphasizes on holistic approach to child development and simultaneously address the physical, emotional, intellectual, and spiritual aspects of a child’s life, thus, enabling the learners to become the sculptors of their own life who can chisel out the masterpiece from what life must bestow. The globally advanced curriculum inclusive of moral and ethical values, blends well with our culture, foster intellectual vision as well as the humane values in the students invigorating them to not only to become the custodians of their life but also of the globe which is also the need of the hour.

Number of staff: 154

Microsoft tools used:
Office 365, Teams, OneNote, Imagine Academy, Minecraft, Skype Field Trip/Collaboration
Microsoft tools have enabled us to create best-in-class content, real-time learning, and personalized instruction anywhere, anytime in a digital format. Microsoft Teams, OneNote, Sway, Office Mix, Minecraft: Education Edition, and Microsoft Forms have all facilitated a paradigm shift in our educational landscape. The Office 365 tools have become such a part of our life that it’s impossible to spend a day without using them. They have helped teachers employ a successful flipped classroom methodology that encourages social and emotional learning (SEL), group discussion, and peer teaching by students.
Ludhiana, India

DCM Presidency School, Ludhiana

We are determined to explore, learn, innovate, and transform teachers and students into dynamic leaders. We already have 65 Microsoft Innovative Educator Experts (MIEEs) and this year 100% of our academic and administrative staff have nominated themselves for the MIEE program.

We have set up an Atal Tinkering Lab (ATL) where curiosity, creativity, and imagination can flourish. There our students have created—among other things—3D-printed face shields, an automatic hand sanitizing dispenser, and a touchless door opener. We have also introduced classes on artificial intelligence, design thinking, and coding.
De La Salle University - Dasmarinas

Digital transformation is part of our three-year development plan. Known as “T3”, this plan envisions De La Salle University - Dasmarinas as a top transformative school by 2023-2024 and recognizes the importance of technology and twenty-first century skills to all academic stakeholders. It includes specific goals relating to technology and future skills, such as enabling faculty to deliver blended and fully online courses and equipping classrooms with technology and multimedia systems.

We share knowledge through webinars conducted by our Microsoft Innovative Education Experts (MIEEs) on how to conduct synchronous and asynchronous online classes using Microsoft Teams, which has been very helpful, especially during the COVID-19 pandemic. As we train teachers and enhance their skills, they are then able to pass that knowledge on to students.

How devices are used:
Shared environment, computer lab

Microsoft tools used:
Office 365, Teams, OneNote, Skype Field Trip/Collaboration
Ghaziabad, India

Delhi Public School Ghaziabad

Our success has been due in large part to rigorous, consistent, and resourceful staff training. We enriched the skills and competence of teachers and in turn they enriched the experience of students with newer and more effective tools and resources. We were the first school after the lockdown to launch remote learning in our region, as our educators were already trained and we already had a well-established online learning infrastructure available to all stakeholders. Our transition to fully remote learning was so successful that we were featured in the national media.

DPS International

Being an International Baccalaureate® (IB), school, technology integration has been a major focus area at DPSI. Microsoft tools have helped us provide a hybrid learning environment where synchronous and asynchronous learning is planned, designed, and facilitated under one platform.

Providing an inclusive learning environment, along with social and emotional learning support, became the top priority at DPSI during the COVID-19 pandemic. Microsoft Teams provided a safe environment for all students to interact with peers, educators, and counselors. It also provided us with a platform for regular assemblies, virtual graduation, counseling and career-guidance sessions, a virtual university fair, virtual field trips, and sessions by industry and subject matter experts. Microsoft learning tools like Immersive Reader, Text-to-Speech, and Translator helped us successfully provide accessible and inclusive education to all students remotely.

Gurgaon, Haryana, India

DPS International
Kamla Nehru Public School, situated in the village of Chak Hakim, India, caters to first generation learners from 65 neighborhood villages. Our school priority is to make them future ready. We are thankful to Microsoft for helping us at every step to empower our students in this journey. We believe that empowered educators lead to engaged classrooms. Our principal, along with 85 educators, were selected as Microsoft Innovative Educator (MIE) Experts in 2020-21. Additionally, 20 of our educators passed the Microsoft Certified Educator (MCE) exam in August/September 2020, giving us a total of 27 teachers with global educator technology literacy competencies who will lead the way on twenty-first century learning.

Number of students: 1,701
School level: K-12
Areas of excellence: Culture of innovation

How devices are used:
1:1 environment, computer lab

Microsoft tools used:
Batangas City, Philippines

Lyceum of the Philippines University, Batangas

The Philippines offers free education to public schools at the elementary, high school, and college level. But the challenge is that these schools often lack the software, hardware, and skills needed to incorporate technology into their curricula. As a private university, we feel that it is our social responsibility to help these schools by sharing resources like computer laboratories and training teachers.

We share knowledge through webinars conducted by our Microsoft Innovative Education Experts (MIEs) on how to conduct synchronous and asynchronous online classes using Microsoft Teams, which has been very helpful, especially during the COVID-19 pandemic. As we train teachers and enhance their skills, they are then able to pass that knowledge on to students.
Microsoft technology has enabled our success because it significantly increases teacher productivity, helping them to distribute content, grade work, personalize learning, and communicate more efficiently with students, parents, and staff. It also enables our students to access learning resources anytime and anywhere. The support of our school leaders has been vital to our success with technology, fostering a culture that encourages and involves faculty, staff, and students in mapping our technological innovation efforts. A focus on continuous user training has also been critical in helping us sustain the ongoing use of technology and maximize its potential. For example, our Microsoft Student Community (a university student organization) helps keep students up to date on new trends and ways to use technology in education.

- Minecraft
- MakeCode
- Hacking STEM
Initially it was difficult to convince teachers and students to shift to using technology, but once it was in place, we saw a drastic change in the levels of student involvement in a variety of subjects. During the COVID-19 pandemic, we were already using Microsoft Teams and Office 365, so were able to make a fast, smooth transition to online learning, unlike other schools.

Today, we have a lot of international collaborations on various STEM topics using tools such as Minecraft: Education Edition. More than 1,700 parents attend our online open house sessions where they can get their queries resolved. Parent-teacher meetings are also conducted over Teams. Live events and sessions by our students are also being conducted on many topics from preschool to class 12.

Our advice to other schools? Trust and proceed. Technology will not replace teachers, but teachers who don’t use technology will definitely get replaced by those who do.

Read more about this school’s journey
Microsoft enabled our school to go online without any delay during the COVID-19 pandemic. Because we had already trained our staff on how to use Microsoft Teams, we were able to transition students seamlessly to online learning.

We’ve come up with innovative solutions, such as using Microsoft Forms for quizzes and holding a virtual “circle time” on Teams for every class at the beginning of the day where they can connect with their teachers and friends to offset the isolation many were feeling due to quarantine. It’s been an amazing journey not only for educators, but for the students as well, opening up new aspects of learning which we had not explored before.

Kyoto, Japan

Ritsumeikan Primary School

The pandemic has reshaped the face of education in Japan. Each student has their own Surface laptop giving them more freedom to learn autonomously or online via tools like Microsoft Teams, Stream, OneNote, and Minecraft: Education Edition. Learning from home also gave us the opportunity to focus on future-ready skills—such as keyboard commands, OS knowledge, and typing—that form the foundation of computer science literacy.

Even now that we have returned to the classroom, the atmosphere is much more student-centered as teachers guide each student through activities while they work at their own pace.

In January 2018, our school decided to move to a hybrid learning model with the help of Office 365. We began by offering free online coding courses. Then, in the summer of that year, we started sending parental notifications and homework through Microsoft Teams. In the beginning, parents and teachers didn't like this approach due to limited devices, internet, and technology skills, but they slowly started cooperating after seeing that students were not only enjoying it, but also submitting their work on time, engaging with teachers, and working more independently than ever before. During the COVID-19 pandemic, we became the first school in Pakistan to successfully move to virtual classes because we were already using Office 365 tools.

Sat Paul Mittal School's vision is to empower students to be future leaders. Because we are in a tier 2 city, our school needed a lot of changes to have a future-ready focus. We tweaked our curriculum to equip students with essential skills through a combination of technology, classroom teaching, student-led projects, and competitions. We use hybrid learning where classroom and online teaching are overlapped. SPMS staff and management are leveraging Microsoft Teams and other digital platforms for seamless day-to-day collaboration. As a result, the school has seen a surge in the competency of not only the students, but teachers and parents as well.

At SEK-Qatar, we really believe in integrating technology into the curriculum in a meaningful way. For example, in a math classroom, students will use Excel to do calculations so they will understand how to apply the tool in a real scenario to solve real problems. We believe technology is not a subject, it is a tool that helps improve teaching and learning. If I had to choose one tool which I believe has been revolutionary for us, it would, without any doubt, be OneNote. OneNote, and especially OneNote Class Notebooks, have been a game changer for us. Being able to access all your student notebooks to provide formative feedback at any time and from anywhere has been a dream come true for our teachers.

**Microsoft tools used:**
Office 365, Teams, OneNote, Azure, Microsoft Cloud Services, Windows 10 Devices, Minecraft, MakeCode, Hacking STEM, Skype Field Trip/Collaboration
Since January 2020, we’ve used Minecraft: Education Edition for year 3-6 students (aged 9-12) for fun, student-centered learning that cultivates creativity and critical thinking. 350 students have purchased their own Minecraft: Education Edition licenses with the support from their parents.

Our primary challenges have been a limited number of devices for student use and limited internet access for students at home. To overcome this, we have asked for donations and collaborated with Microsoft Malaysia to acquire more devices for our school. We also keep our school’s computer lab open after school hours. We have also openly shared our digital transformation with parents, who have been very supportive once they understand the positive learning outcomes we are seeing from using technology.

Microsoft tools used:
Office 365, Teams, OneNote, Surface, Windows 10 Devices, Minecraft
All our students from classes III to XII have Office 365 IDs and are successfully using different applications in the classroom. All the teachers are members of the Microsoft Education community and more than 55 teachers are Microsoft Innovative Educator (MIE) Experts. These teachers are equipped to help students build future-ready skills using digital technologies so they can explore the multitude of opportunities available to them.

Our school is also a pioneer in inclusive education, focused on integrating technology into the classrooms of children with learning disabilities. We are using a wide range of accessibility tools like Immersive Reader, Cortana, and Magnifier to teach these students and improve their learning potential.

Suncity School

Suncity School offers a strong developmental program, integrating academics and hands-on participation to inspire a love for learning and accomplishment. For example, we are helping students learn the basics of programming using Microsoft Azure Insights and other tools. We came in third in the Artificial Intelligence Competition at Microsoft Education Days 2019.

During the COVID-19 lockdown, Microsoft provided us with a perfect platform for collaboration in the virtual world. We were already successfully using Microsoft tools like OneNote, Class Notebooks, Microsoft Forms, Paint 3D, OneDrive, Sway, Minecraft: Education Edition, and Microsoft Teams. Additionally, all of the students and staff already had a Microsoft school account, making it much easier to transition to a completely virtual learning environment.

The Ashok Leyland School

Our school’s curriculum is based on technology integration. Gamification, coding, and collaborative tools are widely used in our curriculum. Our math and science educators are widely using OneNote class notebooks and Microsoft Forms for teaching and assessment. In April 2020, with the arrival of the COVID-19 pandemic, we began holding all classes remotely using Microsoft Teams. Channels are created for each subject, which facilitates collaborative/peer learning among students.

Our advice to others just starting out? Have a vision for change. Enable basic IT infrastructure in your school. Encourage teachers to adopt blended learning and take advantage of the professional development opportunities for educators through the Microsoft Educator Center.

Dubai, United Arab Emirates

The Kindergarten Starters, Dubai

We are a very large primary school with over 4,000 students between the ages of 4 and 10. When we began our digital transformation 10 years ago, our teachers were reluctant and ill-equipped to deliver e-learning. Since then, we have taken significant strides with the introduction of artificial intelligence (AI) and virtual reality (VR) in lessons, coding for all students from grades KG-5, a bring-your-own-device policy from grades 2-5, and the integration of robotics.

We have realized our vision for change through changing the mindsets of thousands of families and hundreds of staff members, 150 of whom now have the Microsoft Innovative Educator Expert (MIEE) certification. Our principal, vice principal, and senior leaders are also all MIEEs and continue learning and serving as models for the teachers.

The Titan School

We have adopted hybrid learning slowly over the last decade. With the onset of online classes in April 2020, The Titan School was able to seamlessly move into a teaching-learning mode using Microsoft Teams, thanks to the input of our Microsoft Innovator Educator Experts (MIEE) and Microsoft Certified Educators (MCE). We’ve found it useful to record sessions so students can revisit them, and the Teams channels enable small group work with collaborative learning and presentations. We use OneNote Class Notebooks for sharing notes and assignments and find that Immersive Reader is a very effective tool to teach English reading and grammar.

Udgam School For Children

Udgam School for Children has consistently grown towards the direction of innovative classroom practices since 2012 as a Microsoft Showcase School. The journey started in 2012 with just two Microsoft Innovative Education Experts (MIEEs). We then started with the Microsoft Student Ambassador Program, where two of our Class X students were recognized for their efforts by the OneNote team.

We’ve been recognized twice at Microsoft EduDays for our initiatives on Sustainable Development Goals & Empathy and were selected as the only school from Gujarat state to show our students’ work on this initiative at Microsoft’s Education Exchange (E2) in Singapore.

Venkateshwar Global School

Our school has established a well-equipped lab to foster innovative and analytical thinking among students. We provide ample learning opportunities around STEM and students are free to show their creativity under the expert guidance of their mentors. Our students received international exposure when they participated in and won at the IRC League, Asia’s biggest robotics competition, in both 2019 and 2020.

Our teachers are also very focused on building connections and relationships. We use Microsoft Teams for one-on-one sessions to help students overcome challenges and provide personal feedback. We also use Together mode in Teams to get the feel of a real classroom that is truly inclusive and engaging for all students.

Because our focus is on twenty-first century teaching/learning skills, we have shifted from the traditional teacher-centered pedagogy to more learner-centered methods with active and collaborative learning environments facilitated by technology. We started with training our teachers and helping them adopt the appropriate technology tools for their subjects. We then trained later-stage students to use Office 365 and other tools through workshops and inter- and intra-school competitions.

Microsoft tools have brought a paradigm shift in the educational landscape at Vikas Bharati Public School. Microsoft Teams, OneNote, Microsoft Forms, Sway, and Minecraft: Education Edition are all used extensively in our classrooms.

Tokyo, Japan
Adachi Gakuen Junior &Senior High School

Adachi Gakuen is a junior and senior high school for boys, founded 93 years ago in the Adachi ward of Tokyo. Our school's teaching philosophy is known as ‘aspirational education’. We focus on fostering students who can learn independently, and we nurture our students to be ambitious and active about carving out their own futures. We believe it is important to enhance our students’ critical thinking abilities by teaching them to proactively consider ‘why things are the way they are’ in order to analyse and solve problems, creatively. In addition, we believe it is important for our students to develop the communication skills needed to collaborate with others, take leadership and have a strong sense of responsibility, build their logical thinking skills to help persuade others and be able to give thought-provoking and inspiring presentations. As a Microsoft Showcase School, we use Microsoft365 technology to help develop the ambitions of our students, with Teams being our most powerful communication tool. It helps to connect our teachers with students and their parents, making it an integral part of our school life. Teachers and students use Teams to communicate, conduct online classes, and submit assignments. We also use Forms for everything from health observations to proficiency checks. The data collected is shared with the faculty and staff for educational purposes. Some teachers also use OneNote to distribute their class summaries. Our students are given many opportunities to present their views through PowerPoint presentations starting from junior high school. In addition, the PC Club is working with Minecraft Education Edition. In 2021-2022, we had the largest number of MIEE students enrolled in Japan.

Manama, Bahrain
Ahmed Al- Omran Secondary Boys School

Ahmed Al-Umran Secondary Boys School is in the capital city of Bahrain, Manama. The school was established in 1962 under the name Hoorah Intermediate Boys School, then was changed to Ahmed Al-Umran in honor of Ahmed Ali Al-Umran, the founder of the educational movement and the first Minister of Education in the post-independence era. The school has 1,137 15- to 17-year-old students of various nationalities, split over 40 classes, and 95 administrative and instructional personnel, including 16 postgraduates and 70 with more than ten years of experience. As an effective school, the school passed all the Bahraini Quality Assurance External Reviews that it has been through, including the Exceptional Period. Numerous local contests have been won by the school, including the Bahraini Injaz Cup thrice, the Education Minister’s Cup for Sports Excellence, and the school scout excellence. In addition, the school was placed third at the Arab level in Toastmaster Tournament conducted in Egypt. Al-Umran vision is providing an educational system that inspires, engages and empowers students to become lifelong learners and productive global citizens in the digital era. Al-Umran mission is to offer a safe and respectful environment where all students and staff have ready access to a full range of current technology, software tools, and applications. Together with parents and families, the entire school is devoted to preparing students for college and careers. Students are enabled to acquire social awareness, civic responsibility, and personal growth in order to face present and future challenges.

South Sehla, Bahrain
Ain Jaloot Primery Girls School

Ain Jaloot Primary Girls School, which named after one of the battles of the Islamic conquest, began its educational journey in 1989-1990. The school has a stimulating and safe environment for learning. The school has received excellent rating from the Education and Training Quality Assurance Authority for two successive sessions, 2011-2012, and 2016-2017. It also achieved Effective recognition in the quality visit during the exceptional period in the year 2020-2021. It won the silver level in the Health-enhancing Schools Competition in 2018. School Location: The school is located in the Kingdom of Bahrain in Isa Town within the third educational district. The school includes (33) from the administrative and educational staff, and the number of the administrative body reaches (13). And (22) from the educational staff, are holders of educational and academic qualifications in various disciplines and with experience and competence in the use of technology and the application of modern education strategies.

Al Hussan Education and Training

The tradition of Al-Hussan Education in Saudi Arabia began in 1956 when Sheikh Abdel Aziz Rashid Al-Hussan started the Arab Cultural Institute for adult education. Al-Hussan went on to expand rapidly with the creation of International School in the Eastern Province of Saudi Arabia, and later, opened its first school based upon international in September 1998, with separate divisions for boys and girls on the same campus. Al-Hussan International Schools are registered with the Ministry of education and follow British program in terms of academics and follow the Cambridge Primary, Secondary, IGCSE, AS and A2- level as well as the IB curriculum. Through its partnership with Microsoft, the school has been able to enhance 21st Century teaching and learning using a full range of Microsoft tools such as Teams, OneNote, PowerPoint, Minecraft, Flipgrid, and coding skills to support teachers and prepare students for the future.

Arya Gurukul

“Vision: To be a premier educational organization that provides foundation for life in the global world to the next generation. Mission: To prepare the 21st century learners, meeting the highest educational and ethical standards in a caring and collaborative environment that is supported by Motivated Workforce, Technology and Research; while Partnering with Higher Education, Family, Civic Organizations and Businesses. We at Arya Gurukul believe that the present day education system is designed to produce a good professional, but does not necessarily guarantee a ‘good human being’. So a distinctive approach is needed in order that the children grow up to be active, curious, responsible and thinking individuals.

Bedaa Almutaw’a Co-Edu School provides high-quality education and 21st-century skills are provided and supported by technology expertise, trained staff, and management. Bedaa Almutaw’a aims to foster creative thinking, the courage of conviction and a positive attitude to draw out the highest potential in every student’s mind, spirit, and body. The school started the digital transformation process more than 5 years ago. With the implementation of Microsoft tools to help support education, the operation, raising the quality of academics, simplifying management performance. As a result of this vision, the school got very good in the evaluation of Smart Learning for the years 2019/2020 and 2020/2021. In addition, the school program our school the only school that get Advanced approval over UAE’s schools. The Emirates school establishment ESE greatly influenced and supported Electronic alternatives and stressed the importance of digital transformation within UAE’s schools, resulting in the full implementation of these new digital technologies initiatives and Policies.

Beijing Huijia Private School

Established in 1993, Beijing Huijia Private School is the earliest member school of the International Baccalaureate Organization in China. It is a boarding and day school that integrates elementary, junior and senior high schools, as well as Chinese and foreign students studying in the same school.
My Institute name is “Bherapora Technical And Business Management Institute”. It’s a attach and co-education Institute. Its under Bangladesh Technical Education Board. There are 23 full time teacher member and about 350 students of this Institute.

Research has found that there is a link between student-teacher relationships and student learning outcomes. Those that have positive relationships with their teachers are highly motivated, focused on their task, and have greater overall learning outcomes. Built on the concept of “Experiential Learning”, BHIS Bhopal’s high-calibre academic educators engage students in innovative and activity-based learning models that allow practical learning and a thorough understanding of the subjects.

Bishop Remigius School

Bishop Remigius School is situated in the heart of Nagercoil Town started in the year 2015. As the world is becoming more and more competitive in nature, we need to prepare the students for facing today’s challenges. For this purpose we have started this school which is affiliated to the Central Board of Secondary Education, New Delhi. Our School has planned to impart the following future ready skills among the students. They are 1. Creativity, Collaboration, Critical Thinking, 3. People Management, 4. Emotional Intelligence, 5. Service Orientation, 6. Negotiation, 7. Decision Making, 8. Cognitive Flexibility, 9. Cognitive Problem Solving. The Teaching Learning process is now happening through Microsoft Teams for the whole school from KinderGarten to Std 11 (1800 students). Students have been able to collaborate together on group projects and assignments and even share their portfolios with their teachers and parents. Teachers are able to share and collaborate online and create dynamic lesson plans and activities.

Bodakdev School For Children

Bodakdev School for Children is one of the newest preschools in Ahmedabad. The school is managed by Udgam Consultancy which has decades experience of managing schools – like Zebar School for Children and Satellite School for Children. The birth of Bodakdev School took place when a philanthropist felt an absence of a world-class preschool in the Bodakdev area. He envisioned a school that offered high-quality and progressive education for children between the age group of 2 and 6. Bodakdev School for Children is a professionally managed independent Pre-school.

Muharraq Bahrain

Busaiteen Primary Boys School

Al Busaiteen Primary School for Boys was established in 1961 AD, and of course the school was in its infancy adopting traditional learning, as there were no technical possibilities during this period, and since the inauguration of His Majesty King Hamad’s Project for Future Schools, e-learning began to be integrated into the educational process and electronic whiteboards were provided. Display devices and various programs to benefit from in the educational process. The Ministry of Education in the Kingdom has also given the utmost importance in teaching and training teachers and students on modern technology, so it contracted with Microsoft to take advantage of Microsoft 365 applications in the educational process, and since this period we started thinking about how to make the most of the Microsoft 365 programs and we developed some training materials to integrate these programs into the educational process. We also trained teachers on these applications. We also thought about how to benefit from these programs in achieving sustainable learning inside and outside the school.

At DAV Public School, Sector 14, Gurgaon we are committed to providing high quality education to students through holistic and value-based education. At DAV modernity blends with traditional ethos. We are committed to provide holistic education by homogenizing the western knowledge while remaining anchored to the Indian cultural moorings. We want to foster an environment that nurtures creative and resourceful minds who think big, think fast, and think ahead.

D.C. Model School is the best school in the region with approximate 4000 strength. Its main motive is to take care every child individually. Spanning over seven decades of long and rewarding history in the field of education behind us, our school community continues to move forward together with confidence, pride and enthusiasm in its Platinum Jubilee. In the school campus we provide many facilities and try to give chance to each and every child to come on the stage under various programs like Future Leader Show, Declamations, Debates, Speeches etc. All these programs are conducted roll number wise to involve each child. D.C. Model is ranked No. 1 by Education World. We provide learner centric education to our children so that they can achieve their full potential in the respective professional fields they wish to pursue. Now we have adopted the technology as well. Now our teachers have become tech savvy and using technology in their day to day life.

DCM International School

The Decent Children Modern High School, the first English medium school in the Malwa belt of the Punjab incorporating the modern ideals of education, was established in Ferozepur Cantonment (Punjab) in the year 1946 due to the vision and relentless efforts of its founder cum Principal Late Sh. M.R. Dass. Today DCM Group of Schools is an educational power to reckon with, in North India. This meteoric rise would not have been possible without the unquestioning and continuous support of the people of the historic town of Ferozepur coupled with the unflagging efforts of the entire DCM family. Today DCM has been able to carve a niche for itself amidst the comity of the best educational institutions in the country. D C Model International School has grown considerably in a matter of a few years. Set up in the pristine surroundings of Ferozepur, DC Model International School offers its children exactly the same opportunities that would be available to any student of a metropolitan city. The school stands testimony to the fact that we believe in endowing our students with the best possible facilities.

**Gurugram, India**

**Delhi Public School**

Delhi Public School, Sector 45, Gurgaon was instituted in the loving memory of an exceptional human being, Late Smt Mala Jaipuria, who held close to her heart the spreading of value-based education to every corner of the country. "Service before Self": the motto of DPS, Sector 45, Gurgaon is a reflection of its ethos and a desire to usher in a new era of knowledge with a belief that every child, however different, has the right to education. A mission to give equal opportunities to each stakeholder for personal growth through 'value added' education. A mission to arm the students with special skills to enable them to be successful in every sphere of life. At DPS, Sector 45, Gurgaon we aim at 'Holistic Development' of every child by inculcating 'Core Values' at every stage through the right blend of academics, activities and sports. Learning at DPS, Sector 45, Gurgaon is interactive and tactile. The school has a capable and committed teaching staff that believes effective learning can only take place if there is a harmonious relationship between home and school.

**Ghaziabad, India**

**Delhi Public School Ghaziabad International**

The DPSG International came into being in the year 2008 - a school that has established systems to enable lifelong learning, self-development and improved performance for excellence all round. The school involves all stakeholders in understanding and implementing the mission and quality objectives and ensures effective delivery of curriculum keeping in view current educational thinking and pedagogy - a school that makes learning a joyful experience. DPSG International is now an IB World School running Primary Years Program (PYP) of International Baccalaureate. PYP is a futuristic and international program for primary years. Education in the current times is viewed as acquisition of skills and competencies than gathering knowledge only. The school organises a variety of activities and events that impart skills that can form the basis for a fulfilling career and purposeful life later on. It is with this purpose in mind that a plethora of opportunities in various fields such as art and craft, photography, music, dance, drama, sculpture, taekwondo, yoga, sports, fitness and the ICT etc. are offered within and beyond school. The students are encouraged to be original, creative, analytical and expressive. The interhouse, intraschool, interschool activities are a regular feature of the school calendar. The students are trained and encouraged to participate in national and international events from time to time.

**Durham School for Girls**

Durham School for Girls is the first British ‘all-girls’ school in Qatar. Linked with the 2030 vision of female empowerment, we aim to ensure an environment where girls can flourish and develop to reach their full potential. This all-female campus provides the security for girls to develop individually, respect Qatari cultures and values, and embrace the British system and methodology. Being part of Durham family, our students and staff are part of the 600-year old tradition and reputation of Durham School UK. Our values of Moral Integrity, Ambition, Responsibility and Kindness flow through all aspects of school life to create a Durham Girl.

Future World School-Wahid Campus

Roots Millennium School (Future World School Wahid Campus) Islamabad was founded in 1988 by Mrs. Riffat Mushtaq (Aizaz-e-Fazeelat), a dedicated, motivated, and committed teacher with an enthusiastic spirit in the field of education. Moreover, its founder took the challenge of introducing the modern system of the methodology of the Montessori System. In the subsequent years, she introduced the International Montessori Method of education. Moreover, Roots became one of the pioneer institutions in having introduced an exclusive Montessori system in the twin cities of Rawalpindi & Islamabad in the year 1988 and brought awareness and understanding about this method of teaching in Pakistan. The growth of the student base in this institution is the success of the Teaching Methodology, Academic Curriculum, faculty & Creativity.

G. D. Goenka Public School

The school has played an instrumental role in the synthesis of a humane and aware society by nurturing learners who are conscientized and promoted to learn for the greater good of themselves and the society. A heritage of individualism, enterprise and free will, the school honed 21st century skills along with catering to contextual challenges and experiences. Goenkan ethos are aimed at achieving a perfect confluence of tradition and modernity, work and play, rights and responsibilities. Goenkan education focuses on creation of rational beings who harmoniously connect to the tenets of the global world and facilitate the dynamism of the individual along with the cogency of the collective. Multi modal learning experiences and blended socio-emotional learning opportunities enable Goenkans to be future-ready and open to an array of discourses that contribute to their holistic being. Imbibing a deeply engrained respect for diversity and transcultural ideas and opinions, Goenkans are well attuned to the progress and values of both indigenous and global learning models. This enables their smooth transition into a host of learning contexts and paradigms in future to chart unique and unexplored horizons.

Nagrota Bagwan, India

**Green Field Sr. sec.school Nagrota Bagwan**

Our mission and vision is to empower our staff members to be technically efficient and strong. Education is about creating, innovating and cultivating curiosity, and we believe that one can broaden the arena of education with complete technological solutions especially offered by Microsoft. We are aware that Microsoft office is one of the most important skills required for jobs of 21st century. For every student and even teachers, especially during the times of pandemic when everyone was locked up in their homes, technology had played a crucial role in the lives of teachers and students as it helped them to stay connected. We as Educators realize the potential of technology based learning now a days, when schools use Microsoft office, teachers and students hands-on experience enhancing their learning and problem-solving by providing digital pens in our classrooms.

Pune India

Indus International School

Located in the cultural city of Maharashtra, Indus International School – Pune, offers holistic education for the primary years to the diploma students by providing them with opportunities that prepares them for the future filled with both opportunities and challenges. The CEO of the school Lt. General Arjun Ray, PVSM, VSM (Retd.), a visionary par excellence, drafted the vision of an IB school in January 2002, that would impart holistic education to students from across the globe. He is of a firm belief that the purpose of education in the 21st century is to prepare the child for life. He deemed this possible, by instilling in teachers and children with core leadership competencies, such as innovation, persuasive communication, critical thinking, grit and more, which equip them to design their future in a VUCA world (Volatile, Uncertain, Complex, and Ambiguous). Vision: To create global citizens and leaders of tomorrow, through the traditional values of love, empathy, discipline and respect – 21st century citizens who think globally and act locally. Mission: To create life entrepreneurs through holistic education and lifelong learning.

Jamnagar, India

Kokilaben Dhirubhai Ambani Reliance Foundation School

KD Ambani Reliance Foundation School was established in the year 1997 to provide schooling for the wards of Reliance employees. It started with a strength of 395 students and 11 staff members. Being a Township school, today we are stronger by 3000 students and 185 staff members. During outbreak of COVID-19 school shifted to virtual mode of teaching-learning. In our quest for the most appropriate platform for hosting virtual classrooms, we were recommended Microsoft teams and there has been no looking back since then. We successfully commenced our virtual classes with help of MST. Now even after reopening of school, we are using MST for its various tools and features.

Navrachana School, Sama, Vadodara

Navrachana Higher Secondary School is one of the premier K-12, co-educational, English medium schools of Gujarat, India. We follow the Central Board of Secondary Education (CBSE) curriculum. Navrachana offers complete and well-balanced education to over 2700 students and has a staff strength of more than 150 teachers. Several distinctions and accolades, such as the nation’s highest “Computer Literacy Excellence Award for Schools” received from the Honourable President of India and the Sarva Shiksha Empowering India Award received from the Honourable Minister of Human Resource Development have marked this journey. Navrachana Education Society (NES) is committed to continue its pursuit of excellence in the management of its institutions, engaging the very best teachers, adopting new age teaching practices, and nurturing the unique potential of each child. Navrachana School’s distinct tradition, culture of innovation and a robust curriculum, provide a fertile learning field for the New Age Child.

Nazareth School of National University

NU Nazareth School is the basic education department of National University. The story of NU-Nazareth School is filled with courage and passion for education that imbues the youth with deep faith and genuine love for God the Father and true spirit of nationalism. Her humble beginning visualized the building of an authentic Christian community with compassion for the poor and where God is Father, and everyone is a brother or a sister to each other. At the beginning, NU-Nazareth School was National University at one end and Nazareth School at the other end.

**New Delhi, India**

**Nirmal Bhartia**

The Nirmal Bhartia School is one of the leading K-12 co-education CBSE school in Dwarka, New Delhi, India. School caters to about 1200 boys and girls and believes in power of community. Our school is a second home where children are encouraged to grow without fear by building relationships of strength and support with their friends and peers, rather than being forcibly pitted against them. Teachers work not alone, but reach out and actively partner with parents, family members, storytellers, artists and nutritionists and more. There is never only one way to learn and open doors bring learning opportunities that are varied and rich. Learning never comes to an end and each living moment is an exciting opportunity to learn. Education is not just a preparation for life, but life itself!

Osaka Municipal Kitatsuruhashi Elementary School

Osaka Municipal Kita-Tsuruhashi Elementary School is a small public elementary school in Ikuno Ward, Osaka City, with a single class for all grades and a total of 124 students. Ikuno Ward is a welfare town with a rich international flavor, where many elderly people and many foreigners live, and there are also many welfare workplaces. In Ikuno Ward, about half of the students have foreign roots, and the school is located in this area. The school focuses not only on ICT education but also on human rights learning, including international understanding and inclusive education. The school was certified as a Microsoft Showcase School for the first time in 2021. It is the only public school to be certified. Translated with www.DeepL.com/Translator (free version)

Bangalore, India

Presidency School Bangalore South

Presidency School Bangalore South (PSBS) was established in the year 2006-2007. It is a unit of the reputed 41-year-old Presidency Group of Institutions. Every parent aspires to provide high quality education for their children, and hence choosing the right school is vital for the child to succeed. Presidency Schools have created a strong and unique brand identity. We encourage our students to develop entrepreneurial mindsets, and our activity-oriented methods of teaching challenge them to step out of their comfort zones, do new things, learn and grow. Technology has been radically transforming the global education landscape and India is undeniably catching up.

Seriputri Science Secondary School (SESERI) is one of the highest-performing schools in Malaysia. As a result, the school began implementing Microsoft’s Education Transformation Framework in 2019 to help give students the tools they need to excel in the future. Ninety percent of the school’s students already bring their own devices to class since the school targets to create an Intelligent Environment. Through Microsoft tools and the guidance of Microsoft best practices, the school creates a personalized, immersive, and inclusive experience for each of its students. The tools used include Windows 10 devices, Microsoft 365, Microsoft Teams, OneNote, and Virtual Field Trip/Collaboration. Additionally, all the school’s educators are MIEs to so that they can collaborate internally and with other Microsoft instructors on best practices and lessons that improve student outcomes.

Petaling Jaya, Malaysia

SMK Damansara Jaya

On the 3rd of January 1983, SMK Damansara Jaya was born. Just like any other ordinary secondary school, its responsibilities were simple but complex – to guide and to teach the younger generations to succeed and to lead the nation in the future. In the first year it opened its doors to the public, it had 3 blocks, 6 classrooms, 24 teachers and a total of 189 students. Over the next few years, the number of students increased dramatically. To solve the problems of overcrowding, two temporary blocks, Blocks D and E, were built in 1985. Furthermore, in 1988, the addition of Block F was planned. Also in the year 1988, SMKDJ was conferred the title "Sekolah Harapan Negara", a great achievement for it's time. In the year 2013, SMKDJ achieved an amazing feat – it was officially promoted to a Cluster School of Excellence. SMKDJ was converted into a single session school in 2015. With the co-operation from the students, teachers and everyone else involved in the school, SMKDJ will be a school to be proud of for years to come. Currently, there are 1096 students with the strength of 64 teachers and 8 non-teaching staffs.

### SMK Kuala Perlis

**Kuala Perlis, Malaysia**

Our school (SMK Kuala Perlis) is in the process of increasing our excellence (achievements) in all aspects of education. In three years, the physical aspects of our school have been upgraded. Our academic achievement has improved, discipline problems have decreased, and our success in co-curricular activities and sports at the state, national and international levels is increasing. 90% pupils are from the lower economic background, parents are working as fishermen, farmers, and laborers. Pupils are from rural areas. There is a small fishing port. Local population is about 25,000. Situated about 3 km from the Malaysia-Thailand border. This area is known as a ‘hotspot’ especially in relation to drugs problems. 90% pupils are Malay, 9% Chinese, and 1% other races. Initially, the school has a negative image because of problematic pupils, fighting, and playing truant. School’s allocation is insufficient. Most of the physical facilities are old, worn out. The school was established in 1979.

Sri UCSI Subang Jaya

Sekolah Sri UCSI Subang Jaya is a private co-educational school which offers the Malaysian National Curriculum as well as the International Cambridge curriculum. Founded in 2000, the school currently has 623 students including both primary and secondary students. By blending the local and international approaches to education, our students benefit from a diverse school experience and culture in an environment that prepares them for global success. As a Microsoft Showcase School (Incubator), Sekolah Sri UCSI Subang Jaya strongly embraces the belief that learning occurs in many different settings beyond the walls of a traditional classroom. We introduce our students to a variety of exciting, stimulating and enriching learning experiences. We further encourage the growth of a global perspective in our school by integrating concepts such as international mindsets, sustainable development and 21st century skills to better equip our students for the demands of the ever-changing world.

Quezon City, Philippines
St. Paul University Quezon City

St. Paul University Quezon City began as a Catholic religious institution for girls and women amid the post-war reconstruction in 1946. It is run by the Sisters of St. Paul of Chartres, founded by Fr. Louise Chauvet with St. Paul, Apostle to the Gentiles, as patron. In its location in New Manila, Quezon City, it continued to grow by adding basic and higher education programs. Already a renowned college with noteworthy alumnae, St. Paul College Quezon City (then known as SPCQ) became a university in the mid-2000’s, and began welcoming boys across all levels. It continues to diversify its programs. Lately, the Certificate for Values Education was added, and its learning community continues to enjoy partnerships with Microsoft, ASUS, edX, and The British Council, to name a few.

St. Mark’s Sr. Sec. Public School

St. Mark’s Sr. Sec. Public School, Meera Bagh is a school that strives for the holistic development of the students. We believe in enabling our students to leave their uncomfortable zone and take their own decisions. We have been pioneers in introducing skill based learning much before it became the buzz word. The school has always been progressive in its practices as students are not only exposed to key ideas in progressive education such as Mobile learning, digital citizenship, design thinking, collaboration, creativity, and on a larger scale, digital literacy but also attain mastery in these ideas.

St. Thomas’ School, Dwarka

St. Thomas’, Dwarka is a world class school which believes its not the imagination which makes you achieve big goals but hard work, persistence and honesty which leads to the accomplishments of the big dreams we encourage our children to have. The school believes in the power of brainstorming creative solutions for the issues which the changing Indian education system puts before the Thomases and its staff members and hence we believe change is the only constant. With this philosophy, we strive to bring innovation in the pedagogy and lay special emphasis on sports along with co-scholastic activities because we intend to see our students as future global citizens and have firm belief this outlook is the foundation of the same. We prepare our students to feel connected with mother earth and as world citizens understand their responsibility towards it and contribute to the global challenges in the near future. We prepare our students to not just learn facts and figures but think ahead with what they have absorbed and use it to create fresh ideas with their imagination. We also uplift them to discover their innate abilities and foster them to understand their true calling and chase it with courage and conviction. We focus on understanding the psychology of each child and teach them the true meaning of a happy state of mind, which directly reflects on the intelligence and emotional quotient of every Thomasite.

Suncity School 37D

Suncity School, Sector-37D, is a co-educational school, engendering gender parity, mutual respect for and among all members of the institution and has a strict non-discrimination policy on the basis of sex, religion, creed or class. In adopting the cultural ideology of ‘Collaboration’ Suncity makes all the stakeholders- Students, Teachers and Parents equal partners in the process of learning. We empower students to take on active roles in their own progress and build within them the intrinsic ethos of ‘Sanskars’ and uniquely engage them while promoting a culture reinforcing the joy of lifelong learning and meaningful existence. Suncity School is a K-12 school and has opened admissions for students from Pre-Nursery to Grade IX & XI for the year 2022-23. The school follows Central Board of Secondary Education (CBSE) curriculum and is essentially a day school, providing a vast range of Co-Scholastic activities during and after school hours for the overall development of the children. Suncity School emphasizes on the holistic development of its students and offers a programme which seamlessly blends significant elements of Indian heritage, knowledge and wisdom with cutting edge digital learning, in an atmosphere which epitomizes Benjamin Franklin’s thoughtful words Tell me and I forget, Teach me and I may remember, Involve me and I learn.

Tenby International School Setia EcoHill

Tenby International School Setia EcoHill is part of the International Schools Partnership and Tenby Schools group, one of the pioneers of international education in Malaysia with nearly 60 years of heritage in the country. Our 14-acre purpose-built campus is equipped with state-of-the-art teaching and learning facilities that help students explore their full potential. Our beautiful campus offers a full sports complex, design and technology laboratories, a modern auditorium and much more, providing ample room for over 100 co-curricular activities where students have room to pursue subjects and areas where they have a passion. Our true value, however, lies in our focus on the whole child. Both inside and outside the classroom, we want to create a supportive learning environment where your child is given every chance to reach their potential, in line with our philosophy of Amazing Learning. By giving students the space and opportunity to own their learning process, they might surprise themselves at what they are able to achieve. This will build their confidence and enable them to achieve local and global success.

The Ardee School

Here at Ardee we offer an inspiring, enriching and inclusive academic environment to our students. From its foundation in 2003, we are proud to offer two exclusively Montessori schools and three K-12 schools in New Friends Colony, New Delhi, Gurugram and Goa. As a school with a global perspective, we nurture in our students a deeper understanding of the self and of the world around them. We hone their natural intellect, individual excellence and their capacity for interdisciplinary collaboration and exchange, and guide them to become confident and conscientious citizen-leaders.

The Ardee School

New Delhi, New Delhi

The Ardee School, New Friends Colony established in 2017, is a secular, child centric co-educational day-boarding school. It offers the International Cambridge Curriculum and the National Curriculum of England and Wales at Key Stage 2 and 3 and offers the IGCSE at Year 10. The students do the A Level programme at Year 11 and 12. The pre primary school follows the International Montessori Programme. The school began with contemplating leadership in building a school-wide vision as a foundation for all-inclusive digital transformation using Microsoft’s Education Transformation Framework. The school weaves the best practices and methodologies of various curricula from across the world to create a curriculum which allows for analytical and critical thinking.

The City School, TCN Quetta Cantt - I

Established in Karachi in 1978, The City School is today one of the largest private school networks in Pakistan with branches in all the major cities across the country. It currently has 178 schools in 51 cities with over 60,000 students and 8000 employees. The City School continues to expand its reach to meet the demands for quality education. The knowledge and skills-based curriculum derived from the UK national curriculum guides students from Nursery to Cambridge International Examinations (for the 16 and 18 year age group), qualifying them for the IGCSE, and O and A Level examinations. The uniform implementation of the curriculum gives parents, students, and teachers the advantage of a smooth and efficient transfer from one school to another within the system.

Aligarh, India

The Blossoms School

Education lies at the heart of the progress and development of a modern nation state. In seeking to educate we are showing our commitment to nurturing and moulding succeeding generations of leadership in all walks of life and a responsible, sensitised, accommodative world citizenry. With the scale of operations envisioned by The Blossoms School we hope, in time, to become the standard bearers in the educational firmament not only of India but the world at large. For this to happen it is imperative that The Blossoms School is imbued with world-class infrastructure. However, infrastructure alone is, in and of itself, not enough. Within our institution we have created a culture of respect and trust and care and belongingness and accommodation. Respect, trust, care, belongingness and accommodation are internalized as core beliefs by all our personnel and lived out by us in our daily lives. These have permeated the environment of our school and our children can feel their impact. This helps them to grow into respecting, trusting, caring, and accommodative individuals. Moreover, all our decisions, from the biggest to the seemingly insignificant, are guided by and based on the bearing they have on our children.

Umm Ayman Primary Girls School

A government educational institution founded in 1961. Located in the capital’s province, the school is strategically located in the middle of Manama, where many vital and service centers are located. This facilitates sharing many activities and events with the community. We host 199 students from the 6-12 age groups, who were distributed to 11 semesters: 5 classes in the first episode, 6 classes in the second episode, and the nationalities of the students in the school vary, spread across 13 countries, mostly from the Pakistani community and 98 non-Arabic-speaking students. The school is part of His Majesty King Hamad’s Future Schools project and UNESCO’s project. In 2012/13, the school joined projects to improve school performance.

**Yuen Long Merchants Association Secondary School**

Yuen Long Merchants Association Secondary School was established in 1978. It was a government aided grammar school in Hong Kong. A whole school approach is adopted to promote blended learning at school. Various online learning platforms and educational apps are applied in lessons to cater for learner diversity and nurture students’ generic skills, and engage students in self-directed learning, “learning how to learn” and knowledge building. With the use of e-learning tools, learning is extended outside the classroom and integrated with Other Learning Experiences (OLE) activities, e.g. virtual visit for the elderly, virtual study tour and online activity day.

Zebar School for Children is one of the fastest growing schools in Ahmedabad mentored by the management team of Udgam Consultancy. The school was founded in 2014. Within such a short span of time, it has been recognized as one of the top ten CBSE schools in the city. Zebar School is a co-educational English medium school. The school creates a balance between academics and extra-curricular activities. It believes in giving each student an opportunity to understand and accept his/her strengths and weaknesses and learn to the best of his/her abilities. Zebar School provides quality education. The school ensures that each student achieves optimal academic and personal potential by providing a safe and nurturing learning environment, which instils a strong foundation for character development and lifelong learning; implementing best educational practices to engage each student in a culturally rich and challenging curriculum and fostering partnerships with families and the community.

Emmanuel College is a co-educational school, located at Carrara on the Gold Coast, offering schooling from Prep through to Year 12. We have been engaging with Microsoft technologies and software for many years now, establishing a program which enables teaching for the twenty-first century. We were one of the first Gold Coast schools to implement Microsoft's multi-factor authentication (MFA) for staff operating off campus. Delivered through Microsoft’s Azure Active Directory, this initiative has strengthened our security posture and protected our community from ever-increasing online threats, freeing our staff to focus on creating an optimal learning and teaching environment.

Freemans Bay School is a thriving school in the heart of central Auckland, New Zealand. We have 500 students with over 84 ethnicities. We have been a Showcase School for many years and have benefited from the sharing of knowledge and resources between schools that also use Microsoft products. We love the ability to connect students within our community to each other. The level of collaboration that they can achieve using Microsoft tools is amazing. For example, students use the collaboration space in OneNote to work together on projects. Working in this way, they learn skills such as delegation, shared responsibility, and time management. An additional way we are transforming learning today is by connecting with experts that are beyond our community using technology. This provides students access to accurate and relevant knowledge about the subjects they are studying.

Napier, New Zealand

Napier Boys’ High School

Like many schools across the country, we were challenged to devise a completely new strategy to provide students with remote learning while New Zealand’s schools were closed during March and April 2020. With only days to prepare, that meant not only arranging for students to receive devices but ensuring they could access resources and lessons – and that teachers were confident using the technology.

One of the biggest barriers to technology use in our school was that staff did not know how to use devices and understand the benefit of it. Now that we have staff who are comfortable using technology in their teaching, we don’t have that barrier anymore. The experience has been so positive that we are even considering becoming a bring-your-own device (BYOD) school next year.

Back to world map  |  Back to region  |  Back to country
Although we began our Microsoft Teams journey early in 2020, like many other schools, we saw that transition accelerated a thousand-fold with the arrival of the COVID-19 lockdown. Because we had already migrated the school's phone systems to a Cloud Calling for Microsoft Teams framework, we quickly rolled out access to Teams for all staff members in just 48 hours.

We published a remote learning plan online, via OneDrive, so families could easily follow along. Some students actually said that they preferred online learning, being able to work without distractions. Teachers held regular, twice-weekly staff meetings throughout lockdown, and the file sharing capabilities meant they could see what their colleagues were doing in their lessons and benefit from their innovations. We used to have teachers who were hesitant about using Teams, but they are now openly enthusiastic advocates.

In place of a one-size-fits-all pedagogy, we use Microsoft Office 365 to help students become agents in their own learning. We have identified five key learner dispositions: Self-Regulator, Thinker, Collaborator, Innovator, and Challenge Taker. The goal of every teacher is to nurture these qualities in each student and guide them on what to do when they get “stuck.”

The tool that really gets students excited is Minecraft: Education Edition. We use it to enhance learning across many subjects, including math and languages, and teachers have noticed higher levels of engagement among their students. We also use OneNote every single day. Students can access a collaboration space with digital modeling books, where teachers can insert interactive videos, or highlight keywords from the text. So if they were to revisit that concept a week later, they can easily pick up where they left off.
All Hallows’ School

All Hallows School is a 159-year-old Catholic independent girls’ school located in Brisbane, Australia, serving secondary school students. The school emphasizes tradition, culture, leadership, and the values of the Sisters of Mercy.

Inner City South State Secondary College

Brisbane South State Secondary College is South East Queensland’s newest state ‘vertical’ secondary school, bringing a global outlook to integrated learning for our students. In collaboration with one of the world’s top universities, The University of Queensland, the College is setting the new standard in education. Located in the ‘Knowledge Corridor,’ the school provides exceptional and real opportunities for our students, forming part of an innovation district that actively connects and creates bespoke programs with industry partners. We strive to ensure each of our students develop the skills to create their desired future by knowing who they are, how they connect, and how they will contribute to the world. We do this by: Challenging conventions Committed to excellence and open to evolving, we are always looking to the latest to refine our education offer. Collaborating with the best. We are strengthened by those around us — surrounded by the best and most respected research facilities and institutions in Australia, we will leave our mark on the world. Thinking globally, acting locally We are creating a proud community where our reach extends beyond our postcode to provide real international pathways. With our sights firmly set on the future, we are setting the new standard in education – now and for the long term.

Contact

Many Showcase Schools provide support or training to other schools in their area and almost all of them are happy to share what they have learned on their journey. If there is a school in this directory that you are interested in contacting or visiting, please fill out this form and we will do our best to put you in touch with them.
