

Why Cloud Management

Deliver better classroom experiences from anywhere

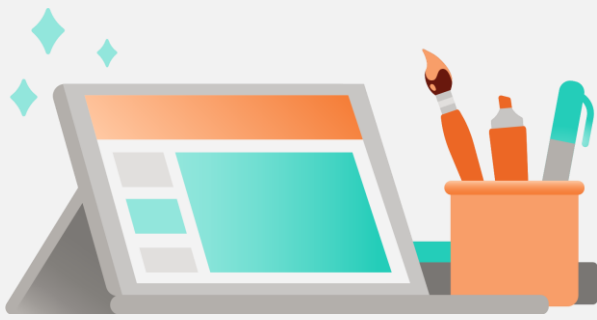

Free your IT resources with the cloud.

As we move forward with blended instruction, we will see more digital tools being used for teaching and learning. We need to prepare or introduce systems that will allow the ease of deployment, implementation, management, support, and security of all the new apps and curriculum.

– K-12 IT Lead

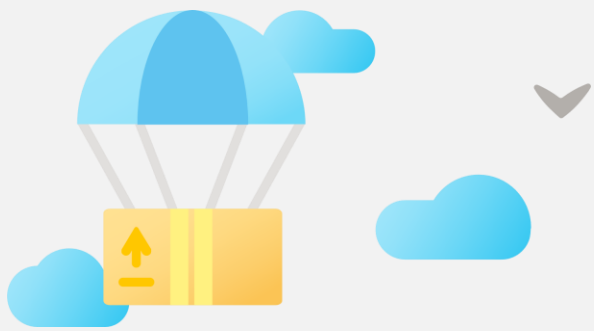

Maximize teaching and learning

Achieve faster logins and minimal downtime with web-based management designed for learning environments

Ease your path to the cloud

Streamline cloud transition with affordable licensing and onboarding resources from Microsoft and partners

Simplify deployment and management

Save time and money with touchless device set up and management from anywhere

Build a secure and scalable platform

Protect student data, safeguard schools from cyber attacks, and take advantage of cloud management innovations

 Get started now on moving to a cloud-based solution
