Increasingly sophisticated digital threats and increased violence on campus make it harder for Institutions to protect students and staff.

In 2016, 78% of crimes against university students and faculty reported under the Clery Act occurred on campus. In 36% of universities are hit by a cyber attack every hour. Higher education accounts for 17% of all data breaches where personal information is stolen, second only to healthcare. 37% of higher-education leaders say their institutions’ locks and doors are not properly configured for safety and security.

Smart and Secure Campus empowers universities to enhance the protection of students and faculty, on-campus and online.

Protect data from breaches and cybercrime
Leverage industry-leading security controls and intelligence to detect and protect against new and evolving cyber attacks.

Ensure your students are protected from identity theft and fraud
Establish defense in depth and remediation measures to enhance the protection of students’ personally identifiable information.

Maximize physical campus safety and accelerate emergency response times
Control building access with ease and quickly identify potential threats with faster emergency notification and response.

Partner with an industry-leader that provides the most comprehensive solution to meet all of your physical and cybersecurity needs.

Cybersecurity and data protection
Enhance the security of personally identifiable information, data, devices, applications, and infrastructure.
Leverage advanced analytics to quickly identify abnormal activity and gain deeper insights into cyber attacks.
Benefit from a team of over 3,500 cybersecurity experts and over $1B invested a year in security.

Physical campus safety and security
Automatically identify suspicious behaviors and people of interest through real-time video analysis.
Maximize safety and enhance communication during emergencies with mobile alerts and safety apps.
Ensure the right people have access to the right spaces at the right times using digital access control.

University of Puerto Rico
"The solution, built on Microsoft Azure, is ideal not just for schools, but for any organization that wants to keep its community members safe. The peace of mind it provides is priceless."
- Efrain Vázquez-Vera, Chancellor, University of Puerto Rico at Humacao

University of Louisiana at Monroe
"The new security platform enhances our ability to make this campus safer and is a powerful crime-fighting tool."
- Lt. Steven Mahon, Acting Director of Police, University of Louisiana at Monroe
